

# Jet Noise Reports, January 2015 – December 31, 2017

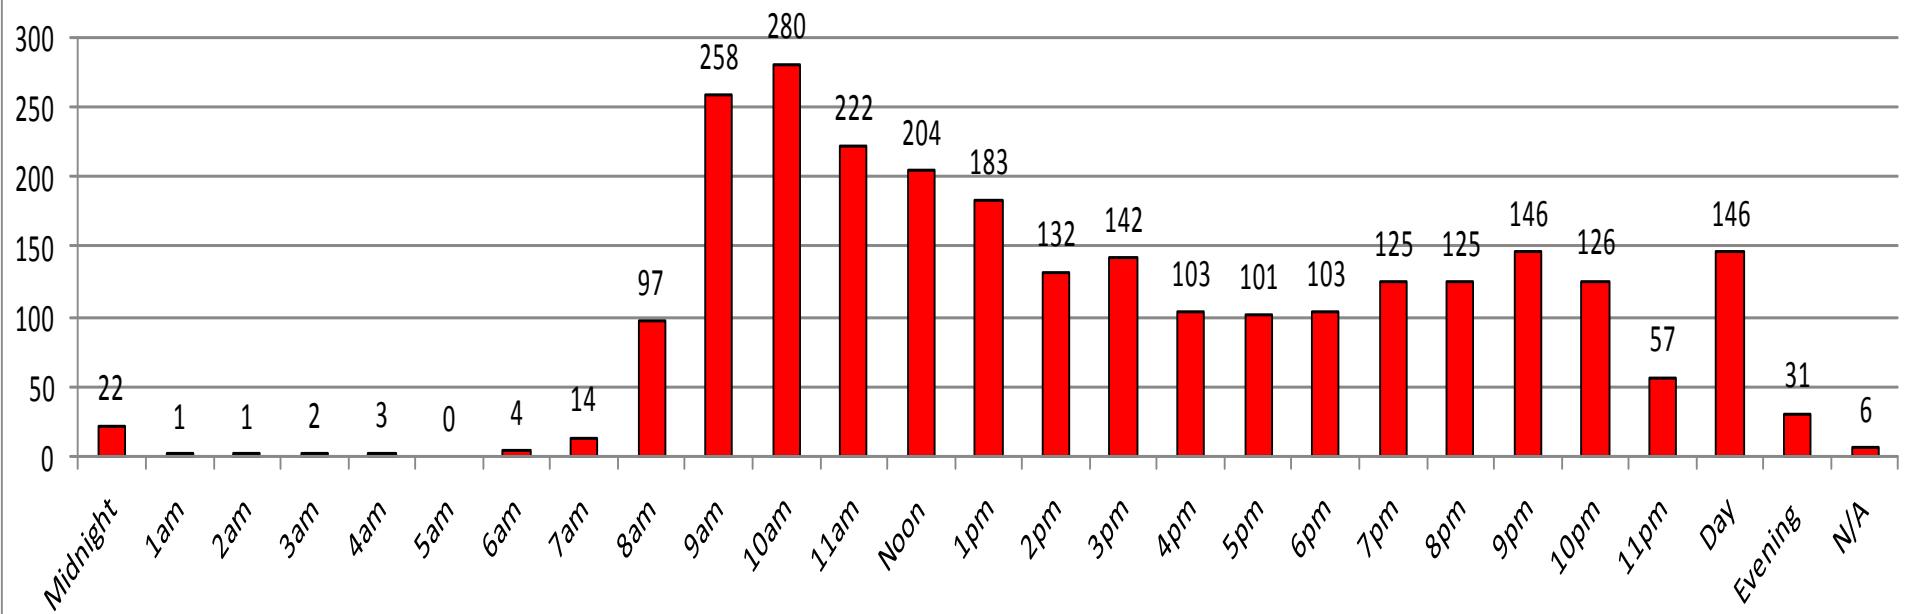

- ⇒ Reports by Totals
- ⇒ Reports of Noise by Hour of the Day
- ⇒ Reports by Loudness
- ⇒ Comments submitted with each report, revealing human impacts

The San Juan County Jet Aircraft Noise Reporting website <http://sjcgis.org/aircraft-noise-reporting/> was developed and approved by the County Council to enable San Juan County residents to have a reliable source for recording and tracking their comments and complaints about jet noise from Naval Air Station Whidbey Island. Reporting began on May 15, 2014; data has been analyzed for this report since January 2015.

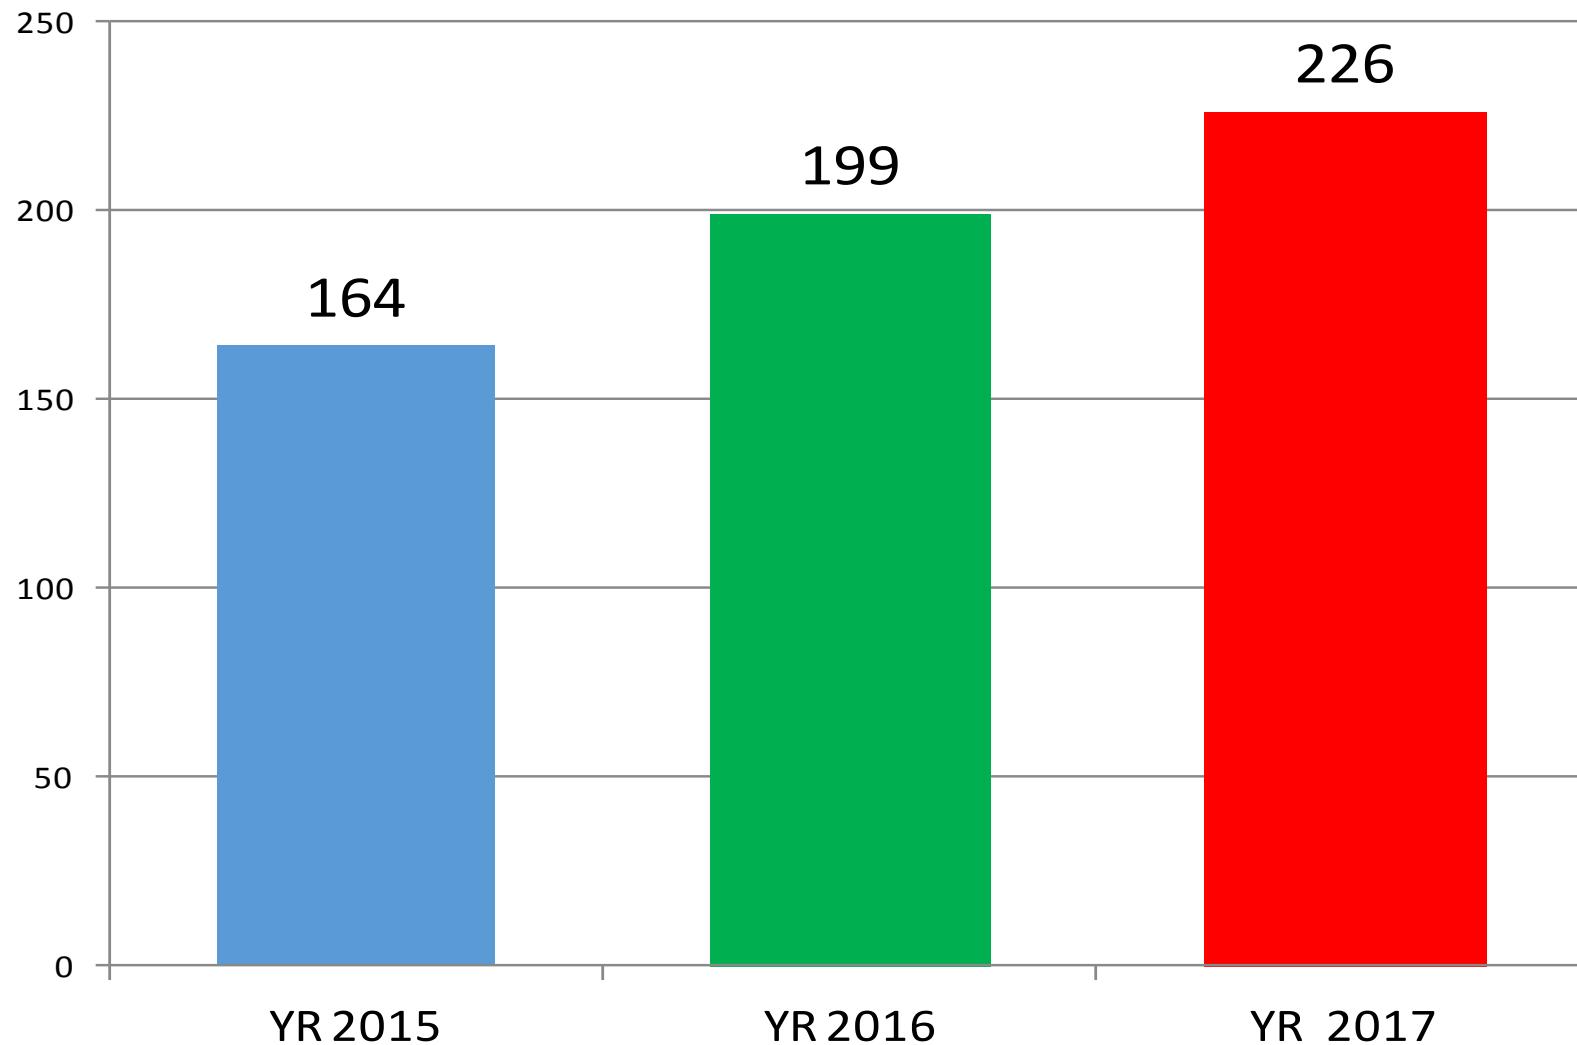

## Hour of Day of Jet Noise Reports

### January - December 2017

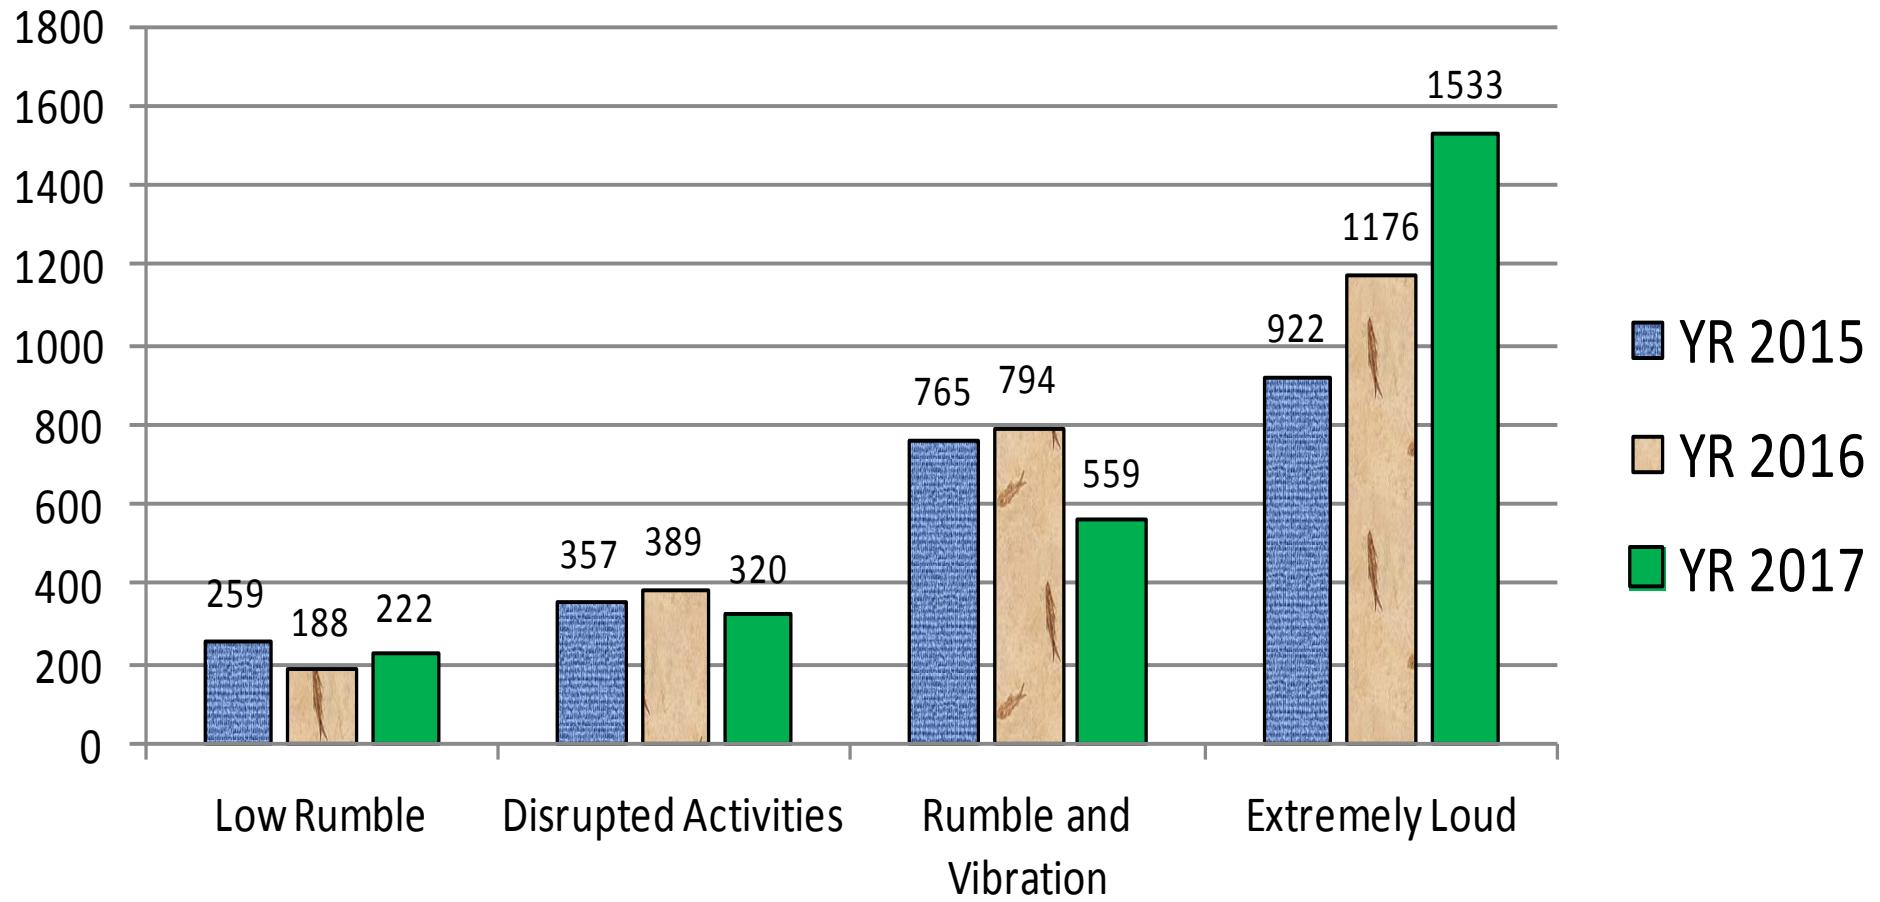

For example, reports submitted reporting noise 11:00 am through 11:59am are clustered in the 11 o'clock hour. Some reports do not include a specific time. For those, related data may indicate Day or Evening. In some cases, time of the noise event cannot be discerned from entered data and is recorded as N/A.

**Jet Noise reports during the time period in the DNL metric that  
adds 10dB penalty for night activity:  
10pm to 7am. 2015, 2016, 2017**

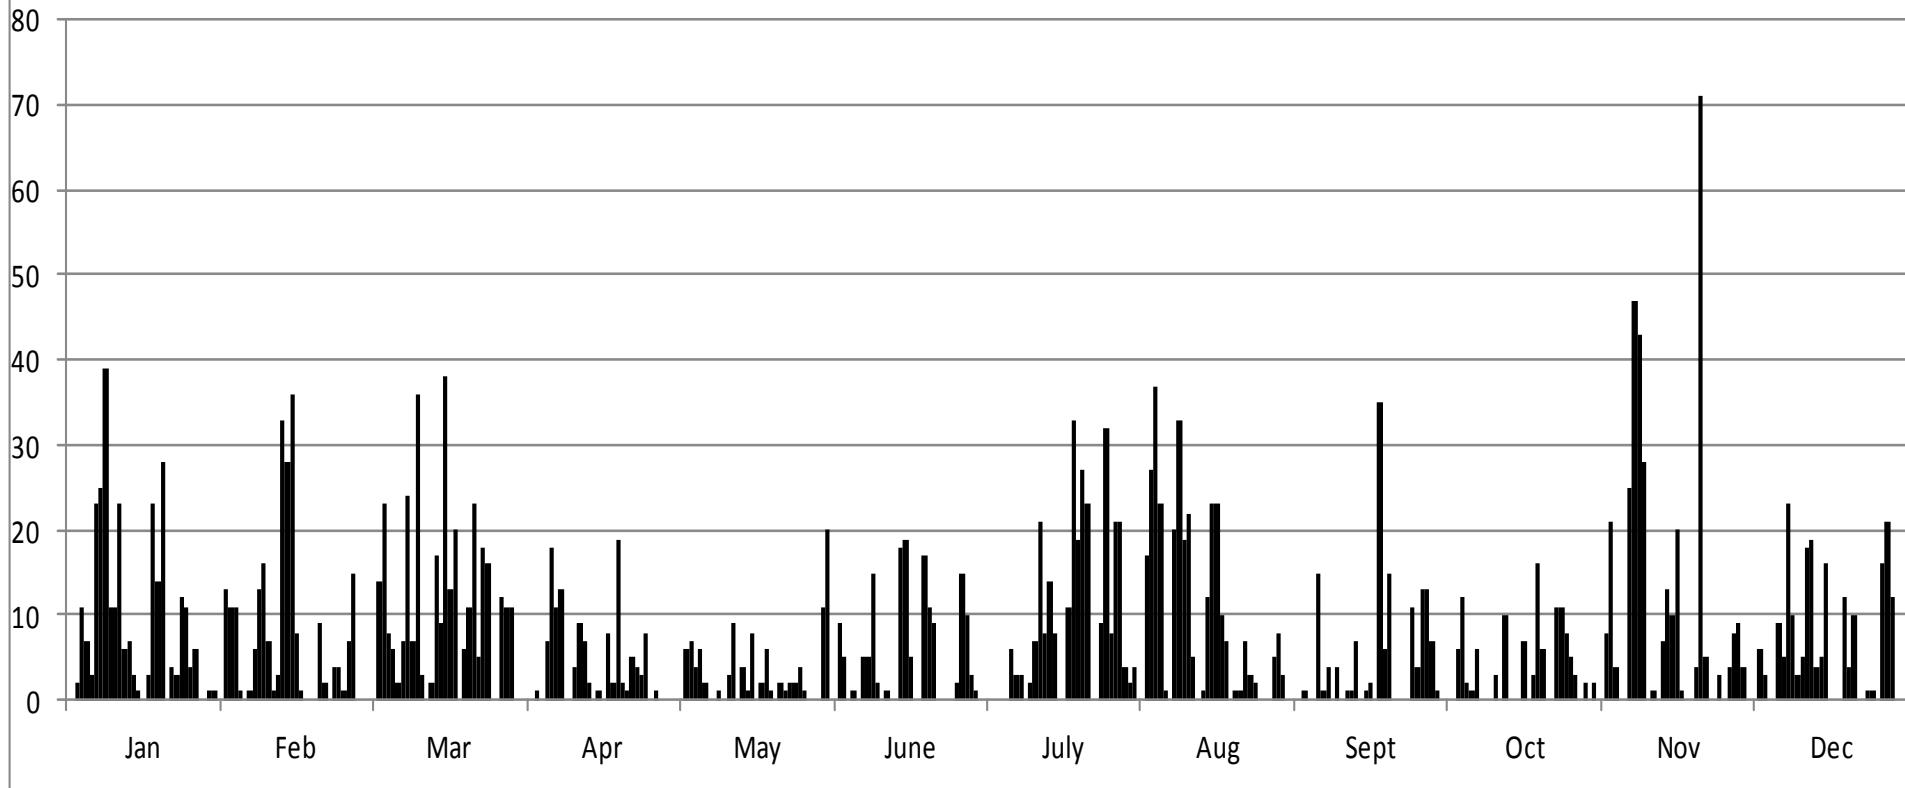

# Jet Noise Loudness Reports by Year

# 2017 Jet Noise Reports San Juan County

## Daily Report Volume by Month

This chart demonstrates the number of noise reports by day, from January through December, 2017. The Navy data persists in using "noise averaging", resulting in a low estimation of the sound/impact of the noise. As seen by this chart, there is no average level of noise. There are many days when the noise is so excessive that reports are quite high. This is also seen in the comments, at the end of this document, when people report "blasts", "roars", and high decibel counts. See also the data in this report on the type of noise reported, where "extremely loud" exceeds "low rumble".

## Comments Submitted with November and December, 2017 Reports.

### **NOTES:**

**As these reports are compiled it has become increasingly apparent that some residents are reporting multiple noise incidents in their comments and in the section titled "Time", but they are consolidating these incidents into one single report. See the comments below for examples. A report is only counted once despite the internal reference to multiple incidents. Thus, the number of noise incidents is actually much larger than the number of reports.**

**Some residents have instruments that measure the decibels inside their home, as seen in a number of the comments. Noise level is measured in decibels, with lawn mowers producing around 90 dB. This is louder than traffic noise -- which averages around 80 dB. As seen in reports now and over the past years, and currently, *Growler jets are producing anywhere from 65 to 118 dBA inside homes.***

Tonight we are being buzzed by jets. It is dark and stormy I am unwilling to step outside to see things but right now the roar of the jet is AGAIN blotting out all sound in my home. It is 9:27pm. What if we were trying to sleep? Is this to be all night?

The roaring of jet activity on Whidbey is taking over our home. We are being blasted. 5:14pm.

I do not know what is going on at Ault Field but we are being shaken by continuous blasts of jet engine activity. Rumbling, roaring and vibrations sent across the water. Stressed.

Being battered again by a vibrating wall of noise from Whidbey. I feel it in my heart and bones. A whiplash of sound and noise waves that penetrate my home and penetrate me. Would Larsen, Cantwell and Murray want this in their homes?

Two jets flew over the house on the 1st and another one at 10:15am on 11/2.

11/17/17, Fri: Growlers over Agate. Extremely disruptive. Estimate 90 decibels. Tourists at Agate Park were horrified. They literally asked why would our Navy be flying over a place like this? They were renting nearby and said never again!

11/1/17, Wed.: 69.8 decibels in the house

I am trying to do a computer research project tonight yet am disturbed and stressed and distracted by continuous roaring and rumbling of jet noise. The NAVY simply ignores the implications of having Growler jets so close to residences. Liars.

11/2/17, Thur: 66.2 decibels

Extremely loud, even inside my very well-insulated house. Raining outside, dark. Woke up my husband who is a very sound sleeper.

The roaring is continuous. It rolls around the skies and penetrates our home. As if there is a constant thunderstorm. Growler jets are too loud. Now experiencing vibrations due to loud roars.

Really outrageously LOUD. Kids are trying to sleep, school tomorrow.

In the morning a Jet went over our work site on Flint Rd. The Jet had its landing gear down and it was the loudest and most disturbing ever. Painful to my ears and insides. Vibration and ear splitting noise.

11/2/17, Thur: 85 decibels - walking on Natl. Monument lands. Horrible roar!

11/8/17, Wed: 77.5 decibels in the house. This is a week with no FCLP's scheduled - BUT - we have had steady noise since 8:13 this morning. - slight break at 3pm - 7

hours of noise and NOW the noise continues until 8:30pm. 12 HOURS OF NOISE total.

11/2/17, Thur: 68.8 decibels in the house.

12/14/2017, THUR: 9:03am - 6:15pm . 9 hours and 15 minutes of Growler NOISE. A few breaks - but mostly solid penetrating vibrating noise. This is a scheduled FCLP Day - the Navy tells us to expect 47% MORE NOISE with the addition of 36 more Growlers

11/2/17, Thur: Another evening of noise. Steady roars and blasts from 6:55pm - 7:45pm

11/2/17, Thur: Yet another Blast -- 65 decibels in the house. Hoped the noise was over for the night - BUT NO!

Jet roars and rumbles make this stormy evening more noisy.

We are suddenly jolted by a HUGE roar. We are inside, it is dark, but it has all the hallmarks of jet noise.

Sudden loud rumble. Sounds like Ault Field is sending lots of noise our way.

Loud jet overhead. Distinctive Growler roaring. Can hear it over the TV and washing machine, which is just too loud.

It is 9:14pm and we have had jets roaring LOUD over us this evening...like NOW. The noise is penetrating our home. What if we were getting ready for bed...with hell breaking loose overhead? Is this the Navy torturing us?

Extremely loud almost continuously over the last hour. Twice I thought some mechanical was malfunctioning with my boiler due to vibration and sound coming from inside the house but it was jet noise

Evening flyover drowned out telephone conversation

Now we have ANOTHER roaring and screaming jet overhead. WHAT IS GOING ON? Does the navy find it acceptable to be terrorizing us at night? The screaming is over-riding everything in this house!!

12/27/2017, Wed: 5:34pm - 7:22pm STILL ROARING AT SE LOPEZ. Clearly FCLP - unscheduled. Almost 3 hours of hideous noise. Growlers should not be in residential areas. Larsen, Murray and Cantwell should invite this War Mission into their neighborhoods

11/2/17, Thur: 85 decibels int he house at 9:25 pm. Extremely loud overflight. WHY?

Another loud jet screaming over our house. Mud Bay, Lopez. It is 9:37 in the evening? Why is this necessary????

Very loud jet noise all day long

overflights and touch and go throughout the day

Loud LOUD roaring.

Jet noise roaring all around us. Cloudy, cannot see, but the noise invades our home, like a hurricane roar. Long and loud. South end, Lopez.

Now we have one or more jets roaring directly over us. Growler noise insofar as it just keeps rolling around, fades, and then returns stronger and louder. Cloudy. Still roaring. South Lopez. Navy needs to be honest about the noise.

Jet noise in the skies, disturbed a walk.

Very loud jet noise - disturbing while inside house and eating dinner. Could not have conversation

unseen but we know the source, don't we

11/6/17, MON: 75 decibels. A quiet walk is over.

11/6/17, MON: Overflight of 2 Growlers. 92 decibels - this is what the Navy calls no significant impact!

11/6/17, MON: 68.8 decibels in the house

the roar's been going on & off & on again for hours. could we move to 3 days/wk? just awful

In Lopez Village, doing errands, slammed by a huge roar that sent vibrations through the air. This is a signature of jet activity at NASWI.

11/6/17, MON: 3:15pm - 5:45pm Steady roars and blasts in the 68.7 decibel range. Impossible to work at home.

Just arrived home and confronted by a tremendous roar and vibration, same old Navy assault of jet activity. Outside, unloading car...unbearable noise. South Lopez.

A wall of noise outside, and now we are getting hit with jet noise inside our home. Huge roars, like a train rushing straight toward our home and into it. Lopez.

Jet noise all day long - very loud

Along with all the blasts of jet roaring and vibration, we now have roars of jets above us. The roaring is dense and continuous,

The roaring of jets continues. This usually means that we will have jets screaming over us later tonight as they "come home", destroying the calm of my home.

We are experiencing excessive roaring with vibrations that shudder our home. It has been continuous. Now 5:27pm

There is a war going on outside, and it has worked its way into our home. The roar and vibration this evening is incredible. We are slammed with what I think are take-offs, and with jets roaring above. South end, Lopez

With the jet noise so loud in our home, I stepped outside to determine noise level. EXCESSIVE. Jet noise is louder than Monday night football game noise.

Jets roaring over our home. LOUD. DISRUPTIVE. And the Navy continues to lie about the noise. The sound is continuous tonight.

6:44pm. Huge roar, rumble and vibration. Heard and felt despite noisy Monday Night Football on TV. Why is a jet more than 14 miles away noisier than our TV?

MORE roaring and rumbling that shakes us inside our home. South end of Lopez. A bad night so far.

Lots of jet rumbling tonight on Lopez Island. Going on right now...vibrating through our home. 6:58pm.

7:04pm. On the south end of Lopez, we are being subjected to excessive noise this evening. Roaring and vibrations are shaking us. Almost continuous. Very disturbing.

11/6/17, MON: 6:45pm - 8:15pm - more noise - noise canceling headphones barely mute the roar.

11/6/17, MON: GIANT BLAST - 83 in the house. How do we protect our lives from our Navy?!!!

We started the evening with loud booms and roars from NASWI, now we have a jet roaring over us, drowning out the TV.

Loud roaring, overwhelms all other sound. Uncomfortable to eardrums.

Enduring an extended roar that vibrates through home and body right now. 8:30am. This characteristic of growler noise. Deep and vibrating. so many miles away from us. Despair.

Another jet roar and vibration hits our home this morning. 8:32am

Whether it is described as a wall of noise, loud, or vibrating, the roar that is penetrating my home right now is unacceptable. The Navy is using aircraft that abuse the residents of this region by invading homes. We live far from Ault Field, but feel it

ANOTHER roaring vibration shakes us. A morning of terror from NASWI. South Lopez.

I am again recording an abusive incident of jet rumbling that shakes our home and our bodies. 9:25am. A stressful morning so far.

Another huge jet engine roar slams into our home. 9:58am. Lopez South. Extremely disruptive. This is what the Navy calls being a good neighbor????

One after another we are getting THUNDEROUS roars that shake us. 10am. A morning of deep disturbance and annoyance. ARROGANT NAVY.

10:03am One after another we are being vibrated by continuous roarings from NASWI. The chair I am sitting on SHAKES. This is abusive behavior by the Navy. The growler is INAPPROPRIATE in this area.

Hit again by a wall of vibration from jet engine activity. It shakes the house and shakes me. ALL MORNING. 14 miles away from Whidbey and there is NO mitigation from the Navy.

Nov 7. The morning from hell. Nothing but roaring jet thunder rolling into our home from Whidbey. South Lopez.

The floor of our home trembles with the jet roaring from Whidbey. This is disturbing and disorienting. Right now. 10:59am. This has been all morning.

Rumbling in the skies continues. It has been an intensely noisy and disturbing morning. Simply unable to give my work the concentration it needs when my chair is vibrating with jet engine activity.

Along with a morning of being blasted by engine roaring from Whidbey, we now have loud jets roaring over us. This is abuse. South end of Lopez.

Jet roaring continues into the early afternoon. It has been an incredibly noisy and disturbing day. We may as well live next to SeaTac. I do not recommend Lopez as a tourist destination, too noisy.

Prolonged deep roaring vibration just rolled its way into our home. Navy invasion. Sounds like war. It causes everything to tremble. The Navy seems incapable of being honest about the noise impact of the Growler. Lost my train of thought.

Assaulted again by a huge roar and vibration into our home from unseen activity on Whidbey. Take-offs or engine run-ups. It results in a war zone on Lopez.

Excessive jet roaring in the skies. Sounds like jets just zooming around. Cloudy, cannot see. Very noisy. Cannot hear my radio.

A day of massive sound and vibration intrusion- sonic body blows. Blasts from operations at Whidbey NAS interrupt and effectively cancel all tasks requiring concentration. An endurance marathon we will always lose, mere citizens of Lopez Island.

These are not feeble roars. They are like earthquakes. The roar is long and vibrating. 1:34pm. This has been going on all day. I am angry at the disruption and arrogance of the Navy that refuses to acknowledge this.

11/7/17, Tue: Constant roar and blast (FCLP's?) 8:30am - 1:32pm. FCLP's scheduled for late afternoon to night. No schedule change shared with San Juan County.

11/1/17, Wed.: Very disturbing vibration - house rattling. 68 decibels in the house

11/1/17, Wed.: Overflight. 92.1 decibels inside the house. This is like a war zone. directly overhead

Low flying Growler aircraft

Low flying Growler aircraft

I WISH I HAD SOMEWHERE ELSE TO GO TODAY TO ESCAPE THIS CONSTANT ROARING AND VIBRATION OF JET NOISE. BUT I NEED TO WORK ON MY COMPUTER TODAY. THIS NOISE IS STRESSFUL. Navy makes me want to leave my home? Is this right?

Jets screaming and roaring over us. It has been a horrible day so far with rumblings that shudder through our home and jet noise pervasive inside and outside. 2:01pm. South end of Lopez.

I will report every disruption that I can today. We have been continually bombarded by jet noise and vibration, beginning early this morning. And I mean BOMBARDED!

For the past 7 hours we have been enduring repeated blasts of jet roaring that vibrates through our home. As if it is thundering ALL DAY, but worse.

The roaring continues. Roaring RIGHT NOW. I am working at my computer today, trying to concentrate, but determined to report each egregious excessive jet roaring from NASWI. It has been ALL DAY.

Ongoing disruptive blasts of intense low frequency noise from NAS Whidbey. The assault on our senses is relentless, creative work is impossible.

Jet roaring overhead. Can't see it, but can clearly hear it over all regular household noise. penetrates our home. Very loud.

Now a flyover- very loud. Hard to be at home trying to work on a creative project.

"Jet absolutely SCREAMING overhead. 3:11pm. Mud Bay.

Classic Growler roar. First the scream, then the roar, then the fade, then the louder roar. The navy refuses to document this abuse."

11/7/17, Tue: 3:15pm Overflight - 78.6 in the house.

Took a quick walk outside during what seemed to be a lull in the continuous jet noise today, but, what a surprise, blown away by a loud and pervasive roar and vibration from Whidbey. Came inside quickly.

4:30pm The roaring continues. Big rolling wave of noise and vibration hits our home.

Roaring continues. Sounds like a swirl of jets above us. Disturbing noise.

11/7/17, Tue: 3:41pm - 6:04pm An afternoon of relentless noise

Company for dinner. Jet noise is very disturbing. Loud.

The noise from jets rolling around the skies is penetrating our home. There is NO PEACE here. The roar is CONSTANT, as it has been all day. The problem now becomes this: will we be able to sleep tonight? This has been a day of Navy abuse.

Jet noise continues this evening. The skies are filled with the rolling thunder of jets, heard in our home above the TV and conversation. It is not a normal noise, and therefore disruptive.

11/7/17, Tue: 6:40pm and 6:45pm More Blasts and Roars.

In the Village and there is a roar in the skies from jets. Slightly less than the decibel level on the south end, but still loud enough to be a disturbance in the night, as if the freeway is next door.

Continuous roaring. The dishes are rattling. This is awful, painful.

Off and on for the last 2 days.

On and off loud rumbling sounds all day.

11/7/17, Tue: 8:30pm Extremely loud overflight - is this the beginning of more roaring or the end? 78.2 decibels shaking the house.

very loud rumbling causing our house to vibrate. I wonder what this does to my internal organs - all the vibration at low frequency

Loud roaring and vibration that shakes the house. Hurts my eardrums, hurts my head.

Yesterday was a day of pain and constant blasts from NASWI. It is 8:17am today and just got jolted by a blast from Whidbey. Another day of assault by the Navy on local residents?

An early start with the rumble that will probably be there all day again.

Just finished noting the 8:17am blast from Whidbey. Another bomb hit our home at 8:19am.

This is the second day in a row that the jets are loud and disrupting our lives. Terrible neighbor's.i hate your noise and it changes our lives significantly.

Another jolting blast from Whidbey hits our home. The floor trembles. I will say it again: I blame Larsen, Murray and Cantwell for their complicity in the lies that the Navy tells about its environmental impact.

Made conversation at breakfast hard.

8:25am. ANOTHER blast rattles our bones. The roars and vibrations from Whidbey are now continuous.

Another jet engine blast in the continuous series of blasts during this 8am hour. Our home shudders.

Another prolonged blast, keeps rumbling and roaring right now, as if we are at the immediate back end of a 747 taking off. Blown back.

Extremely loud jet engine noise, could not sleep, went on for over an hour

11/8/17, Wed: 8:13am - 9:55am FCLP's scheduled for this afternoon not this morning. Supposedly these are just takeoffs and arrivals. Wish our legislators could have this noise happening over their homes.

ANOTHER roaring vibration hits our home. The Navy needs to measure actual.noise impact, and adverse effects on property value.

Intensely loud cascades of house-shaking noise and vibration from Growlers at Whidbey NAS, grinding on for hours. We are collateral damage- Growlers must be relocated to an uninhabited site for these exercises.

Recording for the public record ongoing disruptive effects of continuous vibrating noise from FCLPs at NAS.

11/8/17, Wed: 12:47pm - 2:51pm. Decibels ranging from 72.6 - 81.6 in the house.

Vibrating roar from Whidbey slams into our home. Disruptive.

One right after another of the noise bombs from NASWI. Again the floor trembles with the vibration from the sound waves.

Second day in a row of disruptive roaring and vibration from Whidbey. I finally had to leave my home due to the stress. Returned evening and still getting blown by the noise.

Along with the wall of noise and rolling thunder from Whidbey we have the roar of jets in the skies, which is heard in our home even above the TV. Very loud.

Now it is constant, one roar after another from Whidbey. take-offs or engine run-ups. Either way it is activity that reaches too far. Mud bay, Lopez.

Here is ANOTHER roar and vibration shaking through our home. Constant abuse from the Navy. Now followed by the jet roaring.

I will enter as many disruptive events as I can as a signal that this is a pervasive problem, not just every once in a while. The booming and bombing jet noise and roar is almost continuous. 5:28pm

It sounds as if there are jets flying all around us. The growler is so loud it sends waves of noise around. Dark and cloudy, so cannot see. Sounds like war out there. Very disturbing.

The jet roaring continues. At this moment we are experiencing a roaring noise that rocks into our home.

Another roar and vibration trembles through our home.

The rumblings are now vibrating through us on a continuous basis. 6:06pm

yet another roar slams into our home. One after another. To say that I am irritated is an understatement. Why does the Navy use its jets as weapons on us?

Extremely loud, rumble, roar, terrifying now and all week! This constant roar is driving us crazy. Cannot escape it.

ANOTHER roar and wall of sound waves hits our home. Navy abuse because they fail to acknowledge the environmental impact. Lack of integrity.

Roaring and vibrations continue. By vibration I mean that our home shudders with the waves of roaring...as if a tidal waves hits us.

The roaring continues to penetrate our home. It comes in continuous waves.

ANOTHER roar invades our home. Not good for the dinner hour. The dining room chair vibrates from the vibrations through the floor.

The rumbling continues. It roars into our home.

The rumbling continues, over and over and over and over...like right now. 6:59pm.

The roaring is continuous tonight. I got home at 5pm and the roaring has been going on since then. it is 7:09pm. Is this the way an evening is supposed to be? Filled with roaring thunder from jets?

The roaring tonight continues, and I will continue reporting it as each roar rumbles its way into my home.

Continuous rolling jet thunder is in our home, invaded by the Navy, which does not admit the noise impact of its activities.

almost constant roaring. As a new homebuyer I am dismayed at the relentlessness of the sound today

Roaring, shaking, deeply disturbing

"This afternoon, the jet rumbling was so intense that my whole body vibrated and I felt uncomfortable.

It was very uncomfortable and most likely very bad for my health."

The roaring has started. Will this be the THIRD day in a row of being BLASTED by jet engine vibrations? 8:44am

11/9/17, Thur: 8:44am - 9:56am AGAIN, no FCLP's scheduled BUT it sounds like FCLP's. This is Larsen's Premier Navy Base. . . creating a WAR TRAINING ZONE OVER SAN JUSN COUNTY. GOOD JOB RICK.

The rumbling from Whidbey continues to disturb us.

More jet rumbling that vibrates through our house. I am tired of using the word VIBRATE. But that is what the jet engine sound waves do to us. Exactly.

Jet rumbling continues to penetrate our home.

Another jet engine roar from Whidbey disturbs our home. The Navy needs a dose of honesty and honestly measure and report the noise impact on the environment, including humans.

Multiple flights overhead, noise continuing for 3 minutes

So incredibly loud that no conversation could happen outside for over 3 minutes!!!!!!!!!!!!!! The noise is still continuing at 4 minutes!

Very low right over our house, just above low cloud cover

In a meeting in the Village. Conversation distracted due to very loud jet overhead with a long roar.

Very loud jet overhead in Lopez Village. Cloudy so I could not see it, but it sounded like the classic Growler. very very loud.

Again continued low flying over our house

Over 5 MINUTES of constant LOUD jet noise over North Lopez!!!!

Something is going on. This is the third extremely loud jet screaming over Lopez Village. Too far north. Too loud.

Horrible huge noise. Engineers and I were outside discussing issue and had to cover our ears and not speak to each other. Flew directly over my house - extremely stressful.

In the Village doing errands, which means I am outside, and the jet noise is very loud. Navy maps do not indicate jet paths over this area.

Low flying Growler aircraft

11/9/17, Thur: 3PM - 4:30PM MORE noise that sounds like FCLP but the Navy denies.

Jets are roaring around in this vicinity. The roiling of the roars is disturbing. As if the jets are converging on this area, south Lopez.

Low flying Growler aircraft

Loud jet screaming and roaring overhead right now. 5:15pm. Drowning out TV. It is now one minute into the screaming roar....

Overlight. House shaking

Currently being BUZZED by growlers, with characteristic prolonged Growler scream and roar.

Low flying Growler aircraft

Back from vacation to the creepy sickening roaring in the distance from Growlers-nightly. Last night could hear faintly all the way from Coupeville, tonight a little closer. In Anacortes. Low rumble travels many many miles. Awful anti-peace here

Continuous roaring- ebbing and flowing, beginning with darkness when one wishes peace to recharge for the next day. Heard from Anacortes, near ferry.

Low flying Growler aircraft

11/9/17, Thur: Huge BLAST!

Going into the Lopez library, mid island, and the jet noise is very loud.

11/13/17, Mon: Loud blast - 67.8 decibels

11/13/17, Mon: Wind blowing at 35mph, SSE. Rumble and roar of Growlers is louder and very disturbing

11/13/17, Mon: Wind still blowing SSE. 73decibels of Growler noise is louder than the wind.

11/13/17, Mon: Huge roar and rumble from Growlers and we are about 25 miles from NASWI. Such an invasion of peace and quiet and natural sounds of wind and trees.

11/13/17, Mon: Big wind blowing and extremely loud overflight of Growler. Why are they flying 25 north of NASWI?

11/13/17, Mon: So loud and intrusive.

11/13/17, Mon: Hoping to walk without the roar of Growlers. No luck.

Incredibly loud jet overhead. South Lopez. Because of clouds I cannot see it, but it has all the hallmarks of a Growler with roaring approach and long-lasting roar and scream.

Excruciatingly loud blast from low flying growler. 50mph winds could Udo not mask this decibel level. Sound like the jet was on top of the house.

Jets flying directly over NW corner of Decatur Island. Obscured by cloud cover. It would be nice if they could navigate not to pass over islands. I have come to ignore most of the noise, but this was excessive.

Twice low aircraft disrupted conversation at a friends home.

Above clouds

Loud F-18 overflight, disrupted work activities

Two in a row - one after another

Horrendously loud, directly over the house!

Working outside and bothered by intermittent jet rumbles. The wind distorts the noise and there are too many clouds to see, but it is irritating insofar as I am distracted, thinking something is coming up the road...but it is jet noise.

Felt and sounded like a plane was going to crash into our house! Absolutely insanity to have this happen! This is the 2nd time today!

Third time today I felt under attack!!! Very low aircraft over North Lopez

Home from long day of hard work in Mt Vernon to the sounds of warfare in Anacortes- near ferry. Loud overflight then constant roaring- low frequency. Not a place of peace

11/15/17, Wed: Giant roar

11/15/17, Wed: Over flight of 2 Growlers. The beginning of a long day of FCLP

11/15/17, Wed: Hideous day of noise from 10:28am - 4:50pm. with only brief breaks. This Navy WAR TRAINING ZONE is impacting our health and property values.

Deafening roar for 2 minutes

Another night near Washington Park in Anacortes with the heavens roaring to the south. Creepy ugly noise of Growler warcraft. Makes the night unpleasant.

11/15/17, Wed: Constant roaring from 7:30 - 9:30pm. A total of 8 hours of Growler noise. Completely utterly insane.

Very loud jet activity all day. I am working on the job site and so it is hard to record all the times but it was very loud and disturbing

11/16/17, Thur: Another day of noise begins

11/16/17, Thur: Such a beautiful place to ruin with Growler noise.

11/16/17, Thur: Overflight of 2 outrageously loud Growlers.

Noise was so loud it startled me & I had to look around to figure out what was going on before I realized it was a plane.

Noise was so loud that it interrupted the music I was listening to.

Incredibly loud, unable to be heard without shouting in conversation

Ridiculous number of fly overs with extreme noise reverberating for minutes each time!

LOW LOUD GROWLER OVER NORTH LOPEZ!

Third low jet in a row! My ears are ringing!!!

11/16/17, Thur: Screaming Growlers over Lopez Village.

If I hadn't known better, it sounded like it was going to crash it was so intense and loud.

Another night, yet again peace shattered by periodic screaming jets- since home from work already with constant creepy roar/thunder from the south. Here in western Anacortes. Noise pollution galore.

Could not hear the tv it was so loud. It's been 3 minutes and I can still hear it in the distance and that is not the sound of Freedom

Low flying Growler aircraft

11/16/17, Thur: Sporadic Blasts and roars from Growlers between 4 and 9pm.

jet noise interfering in my child's sleep. located in Anacortes

Episodic shrieking from low flying Growlers disrupting patient care in clinic at Island Hospital.

"All morning and afternoon - very loud jet activity.

Lots of vibration"

11/20/17 Mon: 90 decibels ! Not a good beginning for a week with zero FCLP's scheduled for Ault Field.

Jet rumbling in the sky. So loud I am hearing it indoors while the TV is on.

Loud jet overhead interrupted conversation over dinner. South end of Lopez.

large aircraft flying low. loud rumble of engines.

11/21/17 Tue: On top of Chadwick Hill, SE Lopez. The vibration is overwhelming and scary.

Roaring and rumbling, vibrates house. Very solidly built house, but the roaring shakes the house. What does this do to our eardrums and heartbeats? The noise from these jets is hideous and destructive.

11/21/17 Tue: 80+ decibels. Stunningly loud here at Watmough Bight.

Here we go again. 8:51am. A jet roar that is trembling through our home. Loud and prolonged. A continued sign of an arrogant Navy that denies any noise impact in San Juan County.

Jet roaring is filling the sky and roaring into our home. The Navy bombing for the day has apparently started. Are we going to live in a war zone today? (Like so many days?)

Another jet roar from Whidbey shakes through our home. Navy invasion. Obviously, our homes are not our own sacred places. They are the Navy's War Training property.

ANOTHER jet ROAR hits our home. Sound wave noise and vibrations. Now constant, one after another.

ANOTHER roaring rumble and vibration is shaking our home this morning. I am distracted from my work. The noise and vibration is OFFENSIVE to my body. Stressed.

Noise is popping my eardrums, very painful. I'm inside the house. Noise is horrible and pervasive. How can this be allowed? This noise destroys the quality of life in this area.

The roar and vibration of a moment ago is now continuing. It is NOT going away. The air is filled with jet roaring.

Now, along with the roaring and vibration we are getting jet noise rumbling through the skies. Heard clearly in my home, like jets roaring around in circles above us.

I will continue reporting EACH wall of jet noise that HITS our home this morning. Again, LIKE NOW.

The roar in the sky is CONTINUOUS this morning. Constant roaring from some kind of jet activity. Putting the sophomores up in the sky again? I certainly do not feel safe, knowing their shenanigans.

ANOTHER jet blast rams its way into our home this morning. the Navy may as well just be bombing us, same effect. Shaking.

Not sure how to make elected people understand what it is like to have this roaring, as is occurring RIGHT NOW, hit one's home so that the floor vibrates. The coffee cup has ripples in its surface. This is what the Navy is doing to us.

Just hit by ANOTHER blast of jet roar and vibration. The Navy does NOTHING to mitigate jet noise. We are MILES away, yet the wall of noise hits us so loudly it overwhelms everything else.

AGAIN, we are clobbered by a jet rumble that vibrates through our home. Engine run-ups, take-offs. It may as well be occurring next door. Invasive.

Jet roaring is driving me from my home. ROARING right NOW AGAIN. This has been CONSTANT all morning. Shaking me and shaking my home. I cannot concentrate on my work. The Navy makes my home un-livable.

Terrible neighbors are renting their jets again. Get some sound suppression equipment now.

Excessive jet noise in the skies. Roaring all around. very noisy and disturbing. Sounds of war.

ANOTHER Jet noise blast hits our home. Constant this morning. I am stressed. Bodily shaken from vibrations.

Jet roaring continues this morning. Why should I trust a Navy that does not have the wits to be honest about noise levels and the brains to mitigate the noise?

Another in a CONSTANT series of roaring vibrations that invade our home. 9:58am. Impossible to concentrate on my work when I am rattled by this shattering wall of noise.

11/21/17 Tue: 8:55am - 10:53am - constant roar. Guess the Navy didn't notify San Juan County of schedule change for FCLP's - AGAIN.

JET NOISE IS RATTLING OUR HOME. Would Larsen, Cantwell and Murray live like this, subject their family and guests to this? I doubt it. They are blind to Navy abuse and arrogance.

this is a test

Loud, prolonged sound. Really attention getting.

Loud jet noise all around. Jets sound like they are flying in circles around us. Cloudy so I cannot see. But the noise penetrates our home.

Stepped outside to answer the door and meet a friend and was met by a blasting roar of jet noise. We could not speak, too loud. jet noise everywhere, like being in the middle of a war zone.

Now we have a screaming jet roaring over us. Typical growler scream and prolonged roar.

The sophomoric jet pilots are roaming above, not exactly inspiring me with confidence about my safety. The jet noise is INCREDIBLE, echoing all around my home. The Navy knows no bounds to its arrogance.

I give up. The jet noise is so egregious here at home that I have to leave in order to do my work. I hope the library is quiet. The Navy makes my home uninhabitable.

The jet noise has been CONSTANT ALL MORNING. Will it be like this all day?

Low rumble and vibration

Loud rumble and vibration from Whidbey

10:06 AM- The noise is so loud you hear and feel it while taking a shower. Psychological warfare courtesy of the Navy- a fine Thanksgiving surprise...!

Prolonged fly over

11/21/17 Tue: Growler overflight - extremely loud at Cape Saint Mary on Lopez

11/21/17 Tue: Agate Beach Park - once again the Growlers are screaming over this part of the island. Why do our legislators ignore the Navy War Training Zone that blankets our County??????

Extraordinarily loud jet screaming over the Village. Disrupted conversation during a professional appointment.

A second LOUD jet screamed over us a minute after another one. Lopez Village. Why are they flying over the Village? Are the sophomores sight-seeing?

Walking in the Village. Heard the loud rumble from Whidbey. Like thunder. Annoying.

test

11:37 AM- More of the same disruptive noise.

Extreme screaming jet noise penetrating hospital clinics, disrupting conversations with patients at Skagit Valley Hospital in Mt Vernon

Low rumble much of the day from direction of WNAS.

Constant roar and vibration today. All day. Difficult to concentrate and no way to escape it. Ear protection does not quiet the rumble that vibrates through your whole body.

11/21/17 Tue: 12:23pm - 3:46pm constant Growler noise - this on a day when no FCLP's are scheduled. So far today we've endured 5 hours of Growler roaring. If the Navy can't issue accurate schedules - what else are they not doing?

Loud jet noise roaring around this afternoon.

Left home this morning in frustration with jet roaring that disrupted my concentration for work. Village noisy also. Now home again and the roaring continues.

LOUD jet roaring overhead, south end Lopez.

The noise from Whidbey is till rumbling through our home. Stared before 9am this morning. This is terrorism insofar as the roaring causes stress and lack of ability to have my home be peaceful. Instead, we are assaulted by jet noise. Are we at war?

11/21/17 Tue: 8:55am - 5:30pm - Steady Growler Noise on Cross Rd, Lopez Island - about 25 -30 miles north of AULT FIELD. Why do we have to endure this hideous noise. Noise that would not be allowed in residential areas if the source was private!

My cats freaked out, so did I.

Growlers- what else. After a week with obscenities painted in the sky by these aircraft- home to obscene noise in Western Anacortes- disruptive, sinister sounds. Abuse to the population.

Multiple low-flying Growler aircraft likely with gear down. Very loud!!

Low overflight, very loud, stopped activities inside while jet passed.

Multiple, ongoing flyovers, directly overhead. Insane noise. We are not meant to be living in a war zone, but these jets evoke sensations of dread, alarm, and fear. Awful noise.

Horrible noise on walk across the causeway FOUR jets flying north on west side of Lopez. Think about take off in a jet at SeaTac and horrible noise as jet takes off. That was the sense I got walking underneath the Jets. Unbelievably stressful.

Stop already!

jet just went over our house and inside the house, I had to hold my hand over my ears - it was disturbingly loud - this is the third pass of a jet in the last 15 minutes. I think they are circling. Impossible to relax quietly too loud

VERY LOUD jet above. Lopez Village, 7:35pm. Stopped conversation. So loud we all identified it as a Growler. Followed by another loud roar a minute later.

You idiots are totally disrupting my life today. Why are you flying over Shaw Island. Are you lost? I totally hate your noise. Totally. Fly somewhere else. Like over your house.

8:00 am loud rumbling and vibrations shake the house, my bed and travel through my body - not a nice way to wake up. Now, after 7:30 pm, the jets are still going at it as they have pretty much all week.

Noise pollution from jets in last five minutes causes stress and cancer! This is definitely NOT the warm friendly quiet beauty of the island. Visitors don't come here for relaxation!

11/21/17 Tue: 5:30pm - 8pm MORE GROWLER ROARING. This is a day when NO FCLP's are scheduled and now we have had a total of 7.5 hours of steady roar. Conclusion: Navy schedules mean nothing.

Massive disruptive invasive roar and rumble from Whidbey NAS, going on since early morning and continuing. A pre-Thanksgiving gift from the Navy!

Just to report that the San Juan County Jet Noise Reporting site is not registering the time when reports are submitted. All reports we submitted today are from the morning.

Ongoing disruptive noise from growler practice. Concentrating on tasks working at home is not possible.

Rumble and vibration, loud noise all day long Even while working on a construction site, the planes hurt our ears

flyover drowned out all other noise inside house, rattling of windows

11/22/17 Wed: The day begins with a HUGE Growler ROAR

Here we are, day before Thanksgiving, and the jets are rumbling AGAIN. The noise comes right into our home.

11/22/17 Wed: More Blasting and roaring shattering the day

11/22/17 Wed: Walking on Natl. Monument lands.

Very Loud

11/25/17 Sat: This rumble shakes the house, shakes my body, feels disorienting.

Saturday afternoon. HUGE rumble, roar and vibration from Whidbey slams into our home! South Lopez.

5pm on a Saturday night and suddenly the quiet evening is broken by a tremendous rumbling roar that vibrates through our home. Typical Whidbey roar. Disgusting.

11/27/17 Mon: NO FCLP SCHEDULED. Again, the Navy is not notifying SJC of changes. Relentless noise 3:55pm - 6:47pm Continuous ROAR and Blasting. Thanksgiving company from Seattle is horrified that this noise is allowed. Seattle is quieter!

Low flying Growler aircraft

Loud, late at night. Disturbing.

11/27/17 Mon: Final BLAST - woke up the kids - again.

Low flying Growler with intense noise and vibration

This jet noise resched 77 dBA and that is a short delay from the worst of it because I had to retrieve the meter. It is still flying over and it has been 3 minutes.

Growler noise pollution now and last night at 9:30 pm ( was in bed and awakened by noise.) At least 2 jets flew over my house right now.

11/28/17 Tue: 6:05pm and again at 6:07pm - Hugely LOUD OVERFLIGHTS - SOUTH EAST LOPEZ

Low flying Growler aircraft

"Loud disturbing jet noise all day long

many times it was impossible to carry on a conversation."

Super loud at work - difficult to talk at times which made communicating difficult since we were setting up scaffolding and needed to communicate so no one got hurt.

11/29/17 WED: 8:34am - 9:33 Six Huge roars and Blasts

"They were flying low enough that their noise was echoing off the face of Buck Mountain, which is barely 1,400 feet elevation. I could make out the windows.

I live on the North end of Orcas Island. UNDER NO CIRCUMSTANCES should you be flying low!!"

A Jet just flew over and the sound registered at 77.6. Too loud for peaceful living!!!!

Why were two Navy Jets flying around and over Eastsound in formation? (growlers?) The noise was deafening, disrupted activities, and presented a frightening scenario to those of us who prefer not to use violence and warfare.

Loud rumbling

They have been flying, making noise for a bit more than an hour. This one passed overhead and quite low.

Growler - loud in home

Scared me and the cats!

11/29/17 WED: 1:21 PM - 6:12PM FOURTEEN huge Blasts and roars punctuating the afternoon.

11/30/17 Thur: Another day of supposedly no FCLP's. Another day of horrible intrusive noise: 10:40am - 6:19 pm on SE Lopez. Escaped to a friends house on N. Lopez - 30 miles N of Ault - still huge noise!

Loud overflight

12/27/2017, Wed:SE Lopez, 3 hours and 20 minutes of ROARING. Finally quiet at 8pm. This is like an endurance test. How much can you endure before you go crazy? Shame on Larsen Murray and Cantwell.

Roaring, very loud roaring, this sturdily built house is shaking. That this noise and disturbance are allowed is INSANE.

Evening, roaring like thunder but causes inner ear pain and chest pain. AWFUL vibration.

12/28/2017, Thur: It begins again. 79.3 decibels. Engine testing. Relentless body rattling vibration.

11/30/17 Thur: N. Lopez - 25 - 30 miles from NASWI, 1:10pm - 2:30pm - HUGE ROARS - It's hard to contain anger at our legislators who ignore the NAVY WAR TRAINING ZONE OVER SJC.

12/1/2017, Fri: HUGE BLAST AND ROAR

12/1/2017, Fri: NOISE!

Extremely loud low flying Growler aircraft over my house

The jet was very low overhead. After-burners extremely loud. Seemed to be weaving for maximum effect. Is it possible that because this website is publicly accessible, that they fly over areas where reports have been submitted more often? Hmm..

12/1/2017, Fri: 10:47am and 10:52am - MORE NOISE!

Low flying Growler aircraft with gear down and vibration in the house

I was just woken up by your jet noise. How can we have a normal life if we can't have a normal sleep?

Low annoying rumble heard from Whidbey NAS

12/2/2017, Sat: NOISE, EVEN ON SATURDAY.

12/5/2017, TUE: 9:03, 9:07, 9:10am REALLY LOUD averaging 69.8 decibels. Sounds like takoffs - continuous.

Since 8:30 AM, Extremely loud house-shaking noise, ongoing through the morning. Difficult to concentrate on getting work done at the computer.

Very loud rumbling. At first thought it was an earthquake

12/5/2017, TUE: 9:50 am - 11:59am Continuous noise - several in the 91 decibel range. Navy says no FCLP scheduled. . . So this is just 2 hours of normal Growler noise !!!?

Really, why on such a beautiful day do we have this loud rumble bouncing over our Village? There is no excuse for this noise reaching us.

Loudest aircraft flyover I've ever heard in my life. Plane flew right over American Camp National Park.

Very deep roaring several times, each time at first felt more than heard, then things in the house shook. Affected my heartbeat.

Rumble and vibration; this is the first I've reported, but it happens a lot.

Extremely loud but even worse is the vibration. It feels as though my rib cage is being grabbed and shaken violently. Dreadful sensation. Horrible feeling.

12/6/2017, Wed: Huge noise - 9:06am, 9:07am, 0:17am, 9:25am - 68decibel average.

12/6/2017, Wed: 11:30am - 11:59am continuous noise in the 75 - 84decibel range. loud rumbling, disrupted activities

12/6/2017, Wed: 1:31pm, 1:55pm, 2:01pm LOUD DISRUPTIVE OVERFLIGHTS OF SOUTH LOPEZ

I am on a construction project. Today we had grinders running, chop saws, heaters blasting and even with my hearing protection on, the jet noise was so loud it hurt. Quite disturbing.

Windows and walls rattling.

Rumble and house vibration

Annoying jet rumble from Whidbey and house vibration

12/7/2017, Thur: 8:05am - 9:28am - one and a haif hours of Growler noise . 65.1 - 68 decibels

Shakes the house , sounds like a freight train just down the block, and it's 15 miles away. Where are the promised hushbarns?

Annoying jet rumble from Whidbey and house vibration

Annoying rumble and vibration

12/7/2017, Thur: Sunset Builders, Lopez - HUGE GROWLER ROARS

12/7/2017, Thur: GIANT ROARS

12/7/2017, Thur: 11:25am - 11:48am 70.8 - 82.3 decibels IN THE HOUSE.

All morning at intervals of a few minutes. Rattling windows and walls, as well as objects on shelves. Loud low freq. noise.

Extremely loud roar and rumble all morning making it very difficult to concentrate on work. How can they claim this frequency and intensity of noise is not damaging to humans and the environment? Obviously bad data or lies.

interrupted activities

12/7/2017, Thur: 1:42pm - 2pm - constant Raoars 60.7 - 80.3 decibels in the house

Annoying rumble from Whidbey

All day off and on from our 'caring' neighbors to the South!

12/7/2017, Thur: 4:30pm Huge Blast and Roar. This is supposedly a zero FCLP day - but it's been extremely noisy and disturbing.

It happened around four as well. The sound was so loud I had to stop a conversation outside. Now in my house, I hear my windows vibrating from the sound. There is no reason for this.

Has been quiet last few nights allowing us to feel normal, but some PM sinister thunder to remind us we are not at peace in Anacortes. Hopefully not to late in the otherwise beautiful night.

Loud rumble all day. Disrupted the peace and quiet of a hike on Turtleback.

Jets roaring almost all day. Horrible noise, horrible physical sensation.

Roaring and vibration. My house is solidly built of 10x10 timbers and it is shaking. The noise and vibration are dreadful and painful.

It is hard to select one thing for the loudness since during the day and yesterday, too we had disrupted activities, extremely loud and rumble & vibration - all in a day. Lots of activity - saw jets flying in formation overhead so very loud

12/8/2017, Fri: 10:35am - 11:58am - ANOTHER HOUR AND A HALF OF NOISE - Navy says not FCLP. Sounds like FCLP - so - Lying? WHY?

so tired of this noise

disgusted

All morning vibrations and rumbling noises have been dominating the skies and invading my body. Repetition and recognition don't make those frequent experiences any less invasive or any more acceptable.

12/8/2017, Fri: MORE NOISE!

felt like it was right on top of me even though I could not see it

Windows vibrating. This was the most egregious but noise continued all afternoon!

Jet noise loud and continuous - constant vibration and rumble in the background all day - never a peaceful moment - stressful

Disruptive noise. With a burn ban going on, why does the Navy get to dump more pollution into the air?

12/9/2017, SAT: Noise on a Saturday. Chadwick Hill, Natl. Monument lands.

Noise coming from the direction of Whidbey Island

Felt like a long train was running through my living room

The irony of the all American respect our country military flying and drowning out the peace on our day of rest. All morning first in the south end, now at the ferry terminal

12/10/2017, Sun: 5pm and 5:04pm. NOISE ON SUNDAY - SOUTH LOPEZ

Much of the morning, again later, rumbling and roaring. Destroys all sense of peace in the harmony. Painful, this hurts my ears, and is physically very unsettling.

Beginning in the morning, all day long disruption from house-shaking noise from Whidbey NAS. It is now 5:44 PM and the disruptive blasts and vibration continue. Recording this for the public record to show the effects of this abuse of power by NAS.

At 9:15 and now at 10:05, the sky and our home is saturated with loud rumbling noise and vibration that invades my body.

12/11/2017, MON: Agate beach Park, Lopez. Extremely loud overflight

12/11/2017, MON: Huge BLAST AND ROAR AT THE South End Store on Lopez

Dec 11. 11:58am. Startled by a HUGE roar and vibration. So powerful I felt the air shaking.

12/11/2017, MON: 9:30am - 12 noon. ANOTHER NO scheduled FCLP DAY. And, again, it sounds like 2.5 hours of FCLP.

12:02pm on December 11. Tremendous jolting vibration and roaring. Then followed by wall of noise of jet(s) in the air. Could not see aircraft, but FELT the noise of what I think was take-off.

12/11/2017, MON: 1:50, 1:51 - Huge Noise in the house.

Loud rumble over the sound of my forced air heater and dryer . . . upset my dog. This sucks!

2:20pm Dec 11. Shocking roar ripping through the air. Strong waves of vibration. Very very LONG.

Rumbling

12/11/2017, MON: Been an awful day of noise. 3:40pm 81.6 decibels in the house.

12/11/2017, MON: Noise has been so bad all day - we will go to North Lopez and hope for a few hours of quiet.

5:33 in the evening, December 11. Doors and windows shut and the obnoxious TV Monday Night Football noise going on, and yet the roar of one or more jets is heard clearly ...take-offs? Why does jet noise from so far away penetrate my home?

i'm in the trees so i can't see the plane but one plane at 1:48, then another at 1:50 (as I type this) or possibly the same plane coming back around-- the dishes in the cabinet are clanking and a window is buzzing in its frame

Morning roaring. Insane, horrible roaring.

Roaring and vibration on and off throughout the day. Completely unacceptable noise, no neighbor would be allowed to make this kind of noise, affecting the entire area.

very loud all day long

The morning starts with a roar and vibration that hits our home and our bodies.

Operations from Whidbey NAS are rattling windows and items on our kitchen shelves, ongoing now at 10 AM. A challenging morning- frequent interruptions of all tasks requiring concentration.

ANOTHER ROAR from Whidbey rips through our home. Obviously, homes 14 miles away from Whidbey are not sacred, just part of the war zone.

12/12/2017, Tue: 8:29am - 9:42am . Every few minutes a huge Blast and Roar - sounds like takeoffs. Impossible to work here.

Jet activity at Whidbey is sending walls of noise into our home, rumbling and vibrating us. 9:11am, Dec 12

Trying to concentrate on my work and the Navy is sending roaring jet engine wall of noise slam into my home. The Navy is abusing us. Get the Growlers out of here! Larsen, Cantwell and Murray are brainwashed by the Navy.

ANOTHER ROAR from Whidbey rolls through our home. Irritated.

The jet roaring and vibration is now CONTINUOUS. 9:21am. We are subjected to jet activity that VIBRATES OUR HOME!!! This has got to stop!

ANOTHER VIBRATING WALL OF NOISE FROM WHIDBEY> Arrogant Navy, lying as they say there is no impact to San Juan County. Why should they be trusted?

We are experiencing almost continuous rumbling from NASWI that vibrates through our home. Lopez. 9:44am deep roar and disorienting vibrations that are not just one second, but long-lasting.

Rumbling

Now, following blasts and vibrations from Whidbey, we have jet noise filling the skies as they roam around. And we all know what pilots do in the sky when they are roaming around. Not good.

Left south-end home where jet noise was abusive. Went to the Village. Startled by a deep rumble reaching from Whidbey to middle of Lopez. There is no freedom on Lopez. Assaulted by the Navy.

NASWI is thundering at us again. It has been a day of jet noise barrage from NASWI. Horrible distraction and annoyance. Vibrations felt in my body. Has Navy

acknowledged the noise impact yet? No. Noise still going on as I write.

Floor of house vibrating. Dog barking. Low vibrations have been going on for days.

Vibrating roars have been going on all day. What is it? Take-offs/ Run-ups? Why do I have to hear & feel it when it is so far away? The Growler is TOO NOISY and WRONG for this region. Larsen, Murray & Cantwell place the Navy above regional residents

Just trying to have an early morning outdoor conversation with a friend, and realized this was the third day of heavy rumbling and vibration. It is fatiguing to always try to shut it out.

Morning, intermittent roaring and vibration. Destructive noise, interrupts and overwhelms all meaningful sound in the environment. Painful to ears and heart.

HORRIBLE roaring. Interrupts heartbeat, drowns out all other sound and sensation. HORRIBLE sensation.

12/13/2017, Wed: 9:24am, 9:31am, 10:26am GROWLERS SHAKING OUR HOME.

very loud rumbling which interrupted business phone call

"2 jets flying in formation

very loud and disturbing

flights off and on all day"

Roaring. Although it does not sound very nearby, it causes very painful inner ear sensations. Very disturbing in other ways too, horrible sensations from this kind of noise and vibration.

Every 10 minutes or so big rumbles and vibrations. Nausea due to vibration.

Background rumbling noise. Very irritating.

It's not really a low rumble. It's a deep and disturbing rumble I can hear through headphones while listening to music. I'm trying to work.

Another of the usual intrusion by the not so considerate neighbors.

12/15/2017, Fri: South Lopez, After 9 + hours of noise yesterday our bodies are jolted by the start of another day of BLASTING.

12/15/2017, Fri: S.E. Lopez 9:14am 80.2 decibels in the house. Everything shaking. Unbelievable Noise.

12/15/2017, Fri: SE Lopez - MORE NOISE.

Loud jet with a loud scream and roar overhead. Too cloudy to see, but it sounded like all the other Growlers that fly overhead. The point is that the noise was too loud.

ANOTHER loud jet overhead. South Lopez

Jet overhead- LIAD AS USUAL! Loud rumbles for weeks!

Jet roaring overhead. I am inside so I cannot see it, but I certainly HEAR it!!!!!!

Another loud aircraft above us.

Incredibly loud jet overhead. Typical Growler signature of a scream and then a long roar....then another roar.

Being harassed by a series of loud jets overhead. Here is another one right now. Long screaming roar, with a long roar. As if the jet will never go away. GO AWAY!

very loud jet overhead. They seem to be flying over us one by one this morning. Irritating and distracting.

Excessive noise and long drawn out roaring from jet overhead. The roaring just keeps going on and on, as if it is flying circles over us. Cloudy, cannot see. Very disruptive. Still roaring.....

Loud and low for the past two days

Just got rid of the noise of one jet, and now here comes another. Very loud and piercing roar.

Too loud, too low. Take your war zone to the desert and leave us in peace

multiple flyovers around fisherman bay.

12/19/17, Tuesday: Deep penetrating rumbling interrupting what was a quiet morning.

12/19/17, 8:51am: 78.8 decibel - huge sickening rumble and Blast.

12/19/2017, 8:59am: 73.4 decibels

12/19/2017, 9am: The house is creaking with the blast: 93.3 decibels.

12/19/2017, 9:03am, 9:10am, 9:12am continuous takeoffs and blast and roars. 75 - 80 Decibels. What an awful beginning to the day

12/19/2017, 9:33am: 75decibels - This is a day FCLP's are scheduled for mid afternoon. Is this the prelude?

12/19/2017, 10:14am and 10:28am, Overflights - very loud

Horrible screaming jet noise directly over my house.

12/19/2017, 10:56am: Deep LOUD rumble interrupts my walk on SE Lopez.

12/19/2017, 8:13pm: VERY LOUD OVERFLIGHT.

Why does a growler need to fly directly over Port Townsend?

Deep vibration and roaring. Very painful to inner ear. Very disturbing physical sensations.

12/20/2017, 9:30am: 75.3 - overflight of 2 Growlers

12/20/2017, 10:47am: HUGE ROARING OVERFLIGHT 93.7 decibels. Why? Why are Larsen, Murray and Cantwell ignoring what is happening to this beautiful part of our world. WHY?

loud throughout the day

low rumble and vibration all day

12/21/2017, Thur: Growler takoffs. Loud Rumble. 8:58am, 9:07am, 9:26am, 9:28am

12/21/2017, Thur:

12/21/2017, Thur: 12:02PM, 12:07PM, 12:15PM, 12:17PM HUGE ROARS - SE Lopez

11/15/17, Wed: Another very disruptive low vibration - actually shakes my body and of course the house. This is NOT healthy.

11/15/17, Wed: 70 decibels in the house.

12/21/2017, Thur: Cross Rd. Lopez - about 30 miles N. of Ault - GROWLING ROAR

12/21/2017, Thur: CROSS ROAD, N. Lopez Island. Stunning that the noise so loud 30 + miles from Ault Field. And our glorious Navy continues to say that this is not a "noise impact area".

12/21/2017, Thur: Cross Road - the biggest roar of all - Growlers must be overhead somewhere close. What are they doing 30 miles north of Ault?!!!!

12/21/2017, Thur: 4:54pm, 4:59pm - Big BLASTS AND ROARS from Ault field Growlers. SE Lopez

12/21/2017, Thur: 5:40pm, 5:45pm, 6pm. Very noisy ROARS - interrupting a peaceful Solstice evening.

12/21/2017, Thur: SE Lopez, after an hour break - the Growlers are back. No FCLP scheduled for Ault but it sure sounds like that is what is happening. 6pm - 7:13pm Steady roaring.

Yesterday and today - intermittent roaring and vibration. Painful to eardrums. Unsettling and disturbing physical sensations from jet disturbance.

I was walking my dog on my property in the Olympic foothills outside Port Angeles, enjoying the quiet until the Growler flew overhead.

REALLY???? On Christmas? What about the family of the pilots; what about PEACE ON EARTH. What about the peace around or homes?

I was awakened by the Growler rumbling at my home in the foothills of the Olympics outside Port Angeles

12/27/2017, Wed: I guess our vacation from Military Noise is over. The Growlers are back, the stillness is shattered.

12/27/2017, Wed: Chadwick Marsh, SE Lopez. The day was so beautifully still until the Growlers started ROARING 10:40am, 10:55am, 11:27am, 11:55am The Growlers need to based somewhere else

12/27/2017, Wed: SE Lopez, 11:26am, 11:56am 78.6 decibels.

12/27/17: Wednesday: We've had 6 magnificent days without GROWLER noise. Now that it's back - so is the stress and the adrenalin.

12/27/2017, Wed: Yet another jarring ROAR at SE Lopez.

12/27/2017, Wed: 80 decibels in the house - SE Lopez - generated by a Growler take off at Ault Field 12 miles South. This is insane.

12/27/2017, Wed:SE Lopez, it appears that ONCE AGAIN NASWI is doing FCLP's at Ault that are scheduled for OLF. And they did NOT notify San Juan County. Started at 4:40pm - still going on at 5:28pm Loud Roars, House shaking, body shaking.

Just returned from family Christmas, and was at first alarmed by rumbling and vibration, wondering what it was, and then I remembered. Oh yes, the Growlers. The sounds always push my alarm buttons because they are so out of place and context.

From 8:30 AM until 6 PM this evening, a constant barrage of house-shaking noise from Whidbey NAS. My wife is sick with a debilitating cold, trying to rest amid this punishing sound and vibration.

Nothing like a little sinister thunder rolling from the south to shatter the peace of the holiday season. War gams over our heads. Disquieting

Since 4:30 PM, rumble heard inside my house from direction of NAS Whitbey, for ~15 seconds every minute or two.

12/28/2017, Thur: SE Lopez, The beginning of another day of crashing, startling noise. Do our legislators understand that this area, this region is know for peace and quiet? Do they consider that there is an economic value to peace and quiet?

A loud blast and rumble begins the morning, more invasive, disruptive blasts continue now at 11 AM. Another day of relentless noise... no respite for us who live 14 miles across the water from Whidbey NAS. Our well being is of no concern to the Navy.

12/28/2017, Thur: Here it comes again - giant rumble and then a blast. No FCLP's scheduled for Ault today. But that means nothing - almost never tell us about changes. Like last night!

12/28/2017, Thur: SE Lopez, 9:53am, 71.2 decibels in the house - everything shaking

12/28/2017, Thur: SE Lopez, 9:53am Unbelievably loud!!! Actually registers 101.6decibels in the house. Insanity. Will try to find a quiet spot on N. Lopez. The Navy and legislators are driving us out of our homes.

12/28/2017, Thur:SE Lopez, Blackie Brady Park, The morning Blasting from Ault Field continues - shattering the day

Completely disrupted (physician) phone call with nursing staff regarding patient care for >45 seconds- screaming loud overhead while on phone. Then could shout and be heard for next minute. Island Hospital parking lot. Anacortes

12/28/2017, Thur: SE Lopez, Mackaye Harbor, SO MUCH GROWLER NOISE!

12/28/2017, Thur: S, Lopez, Mackaye Harbor - Growler noise is blanketing the day. Lapping waves, bird sounds, breeze - all gone - just the ROAR from Ault Field remains.

12/28/2017, Thur: Agate Beach S. Lopez, Visitors to the park are asking where this noise is coming from. We answer: Navy at Ault Field.- 12 miles away. They express

disbelief that this is happening and Larson, Murray and Cantwell say it's OK!

LOAD LOW JET OVERHEAD!

EXTREMELY LOUD AND LONG NOISE BEGINNING WITH A WHISTLE SOUND! Still going after 3 minutes!

12/28/2017, Thur: SE Lopez, 12:45, 12:47, 12:49pm. HUGH BLASTS.

12/28/2017, Thur: 1:30pm, 1:39-1:45pm For a NO FCLP day, it has been very noisy on S Lopez. Imagine 36 more Growlers. . . . .

very loud rumbling from engine testing for last four hours

Such loud continuous intrusion into office hours.

12/28/2017, Thur: 3:44pm - 7:15pm 3.5 hours of NOISE. FCLP's that were not scheduled for Ault and the Navy neglected to report the schedule change. NOISE . . . 60 - 78decible noise.

How to ruin a nice lunch.

Jets flying very low, repeatedly and directly overhead. The sound tears up the environment. Inescapable noise and disruption. Horrible, horrifying noise.

"12/29/2017, Fri: S Lopez,

9am - 65.4 decibels, 9:02am - 75.3 decibels in the house. The War Zone begins for the day."

12/29/2017, Fri:

12/29/2017, Fri: 76.4 decibels

12/29/2017, Fri: 65.4 decibels

12/29/2017, Fri: SE Lopez, Walking in this Growler noise is NOT relaxing. Who protects us and our homes from the Navy?

12/29/2017, Fri: 10:24 - 10:35am Sounds like UNSCHEDULED FCLP's - AGAIN.

12/29/2017, Fri:SE Lopez, A day of NO SCHEDULED FCLP's - BUT - what sounded and felt like FCLP from 10:46am - 2:30pm. So discouraging. We clearly can not trust what the Navy tells us.

Beginning at 9 AM, thunderous events continue through the morning (11:30 AM). The third consecutive day for invasive noise and house-shaking vibration caused by growler activity at Whidbey NAS. Citizens' well-being is not a Navy priority!

12/29/2017, Fri: 11:03 - 11:30am More UNSCHEDULED FCLP's????

12/29/2017, Fri: Cross Road, Lopez: Relentless ROAR - louder than the pounding rain. NO FCLP scheduled - but they are clearly doing it. . . . and it is loud and clear 30 miles N. of Ault Field.

"The sound of the growlers roars inside my head," says my wife who is sick in bed with a bad cold with flu-like symptoms. Hard to recover one's health while being assaulted by deep penetrating blasts from growlers at Whidbey NAS.

Extremely loud this morning, and yesterday the noise was nonstop. This has got to stop!
