

With the addition of 36 more Growler jets in 2019 at Naval Air Station Whidbey Island, the region has been bombarded. **The number of noise reports in 2021 exceeds the number reported in 2020 by 50%. As for the first six months of the year, January/June 2022 reports are 49% higher than those reported in 2021.**

### **IT'S COME TO THIS...**

**"Here, despite a gargantuan administrative record, covering nearly 200,000 pages of studies, reports, comments, and the like, the Navy selected methods of evaluating the data that supported its goal of increasing Growler operations. The Navy did this at the expense of the public and the environment, turning a blind eye to data that would not support this intended result. Or, to borrow the words of noted sports analyst Vin Scully, the Navy appears to have used certain statistics 'much like a drunk uses a lamppost: for support, not illumination.'"**

*December 11, 2021, Federal Magistrate J. Richard Creatura released his Report And Recommendation to the court in State of Washington, et al., v. United States Department of the Navy, et al., Case No. 2:19-cv-01059-RAJ-JRC, declaring that the Navy's 2019 decision authorizing the expansion of EA-18G "Growler" at Naval Air Station Whidbey Island (NASWI) violated the National Environmental Policy Act (NEPA).*

**"Regardless of whether or not you support the Navy's mission or its expanding presence in our public lands, waters, communities, and in the airspace above us, it's good to take a rational look at how we came to have an electronic warfare range for the loudest jets on the planet over the quietest national park in the Lower 48." ## **Jet Noise Report May & June 2022**

**Forks School zone: all bloody day circling every hour multiple times. Blood pressure high, angry and resentful I cannot be at home or school or walking in nature without all the noise. And STILL flying overhead without chance of escape.**

**Mount Vernon: Extremely loud. Multiple flights right over us. Had to go indoors AND put in earplugs.**

**Port Townsend: Jets making ungodly noise around Port Townsend and elsewhere. My tax dollars going up in very expensive jet fuel exhaust.**

**Anacortes: Deep deep thunder- audible and palpable. This is so very disturbing and unnerving- even in Anacortes miles away from where these warplanes are pummeling Coupeville. After 10 pm. This is abuse.**

**Coupeville: Can't go to sleep. This noise from the growlers at OLF continues. 11:00 pm Coupeville.**

**Oak Harbor: Trying to take care of patients in a medical clinic on a Tuesday afternoon in Oak Harbor- keep getting interrupted by noise too loud to communicate.**

Since 2015 an increasing number of jet noise reports are reported by residents of the Salish Sea region, using the San Juan County Aircraft Noise Reporting Website. This document provides data broken out by reports generated inside San Juan County and outside.

The San Juan County Aircraft Noise Reporting website was approved in 2014 by the County Council for people to have a reliable place for recording their reports and comments. Data reports began in 2015.

[gis.sanjuanco.com/aircraft-noise-reporting](https://gis.sanjuanco.com/aircraft-noise-reporting)

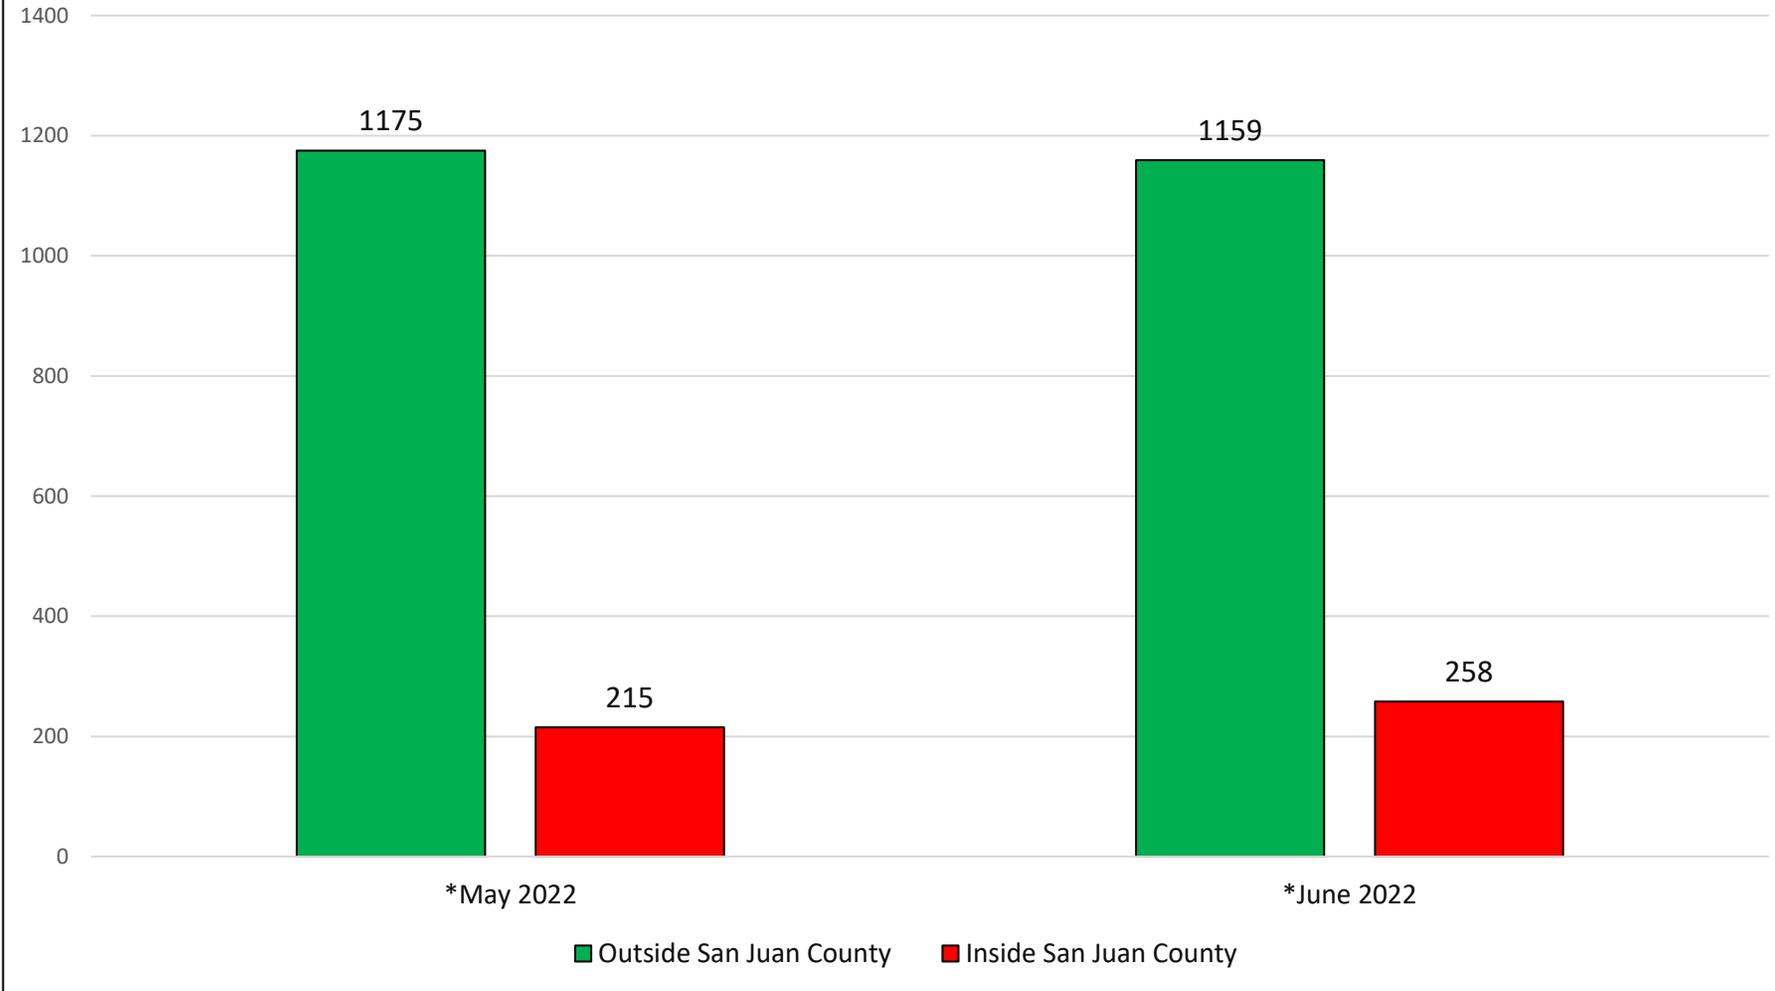

In October, 2019, permission was given for people outside of San Juan County to use this noise reporting website. We are seeing an increasing number of reports from the wider region. This report is compiled by Quiet Skies:

### Jet Noise Reports by Location May-June 2022

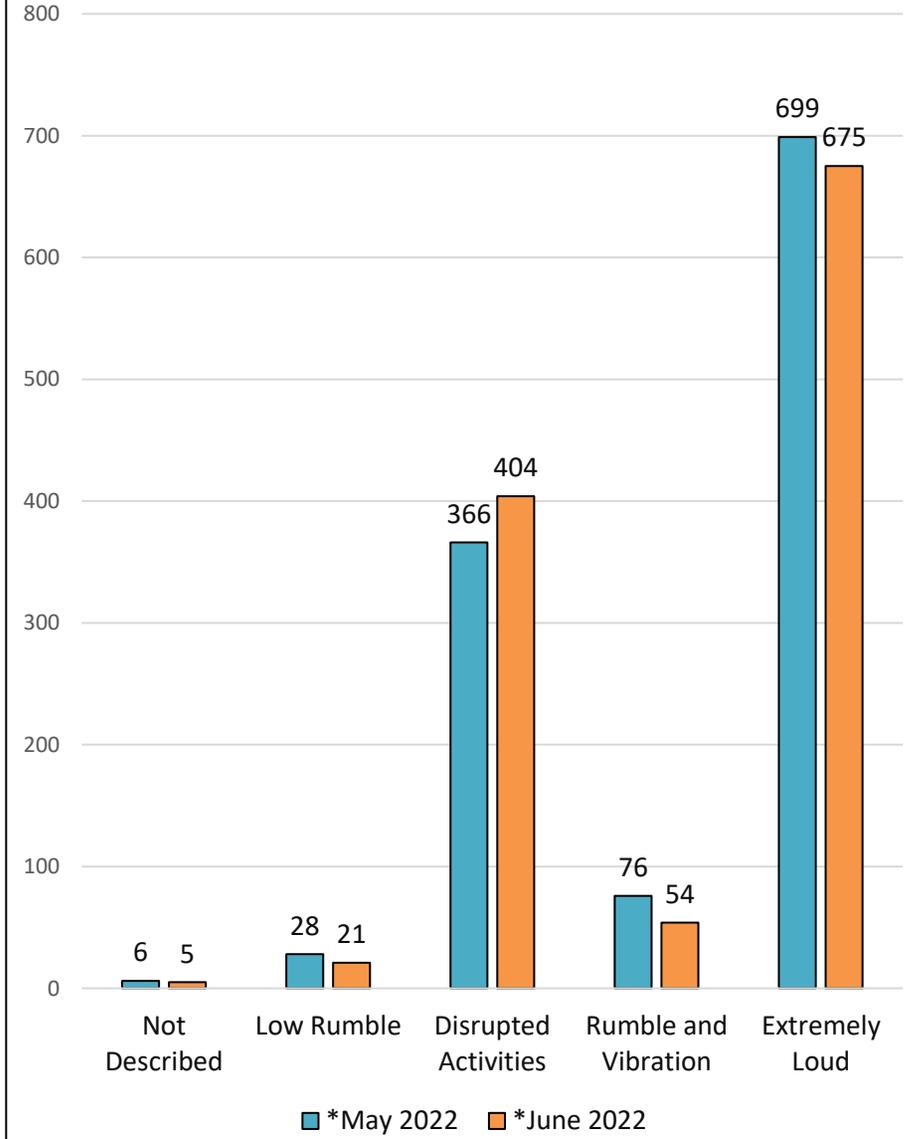

**In 2019 the noise report website expanded beyond San Juan County. With difference in flight paths and population it's not surprising that communities such as Whidbey Island are making more noise reports than San Juan County. The map on page 10 indicates the impact of the Growlers is felt throughout San Juan, Island, Skagit, Jefferson and Clallam Counties.**

### Jet Noise Reports by Type of Noise **INSIDE** San Juan County

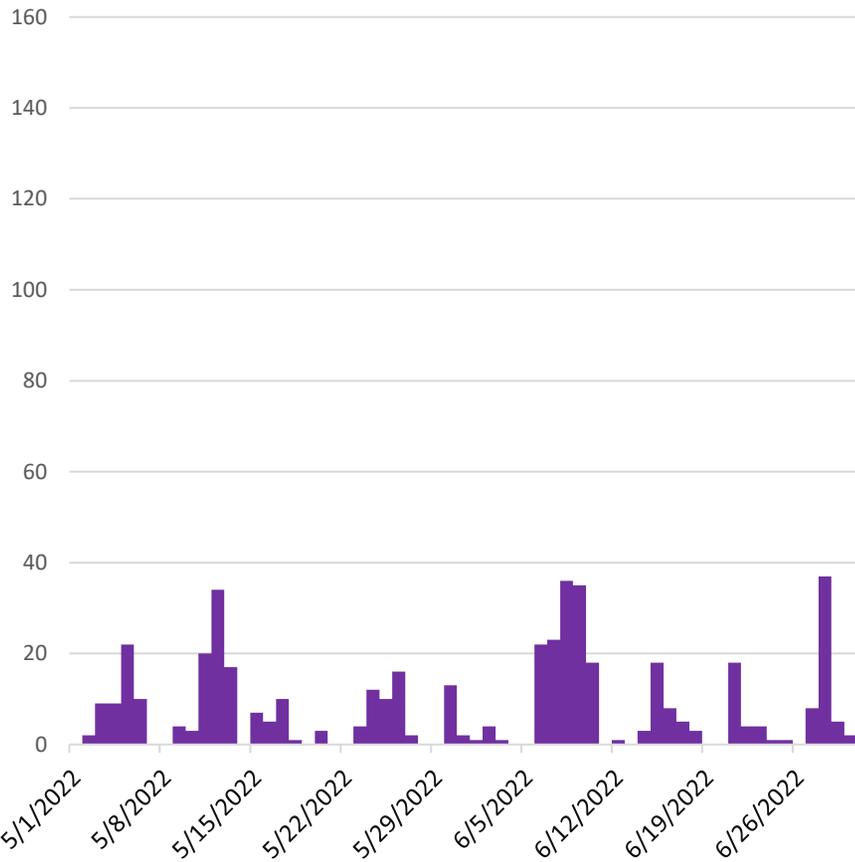

### Jet Noise Reports by Type of Noise **OUTSIDE** San Juan County

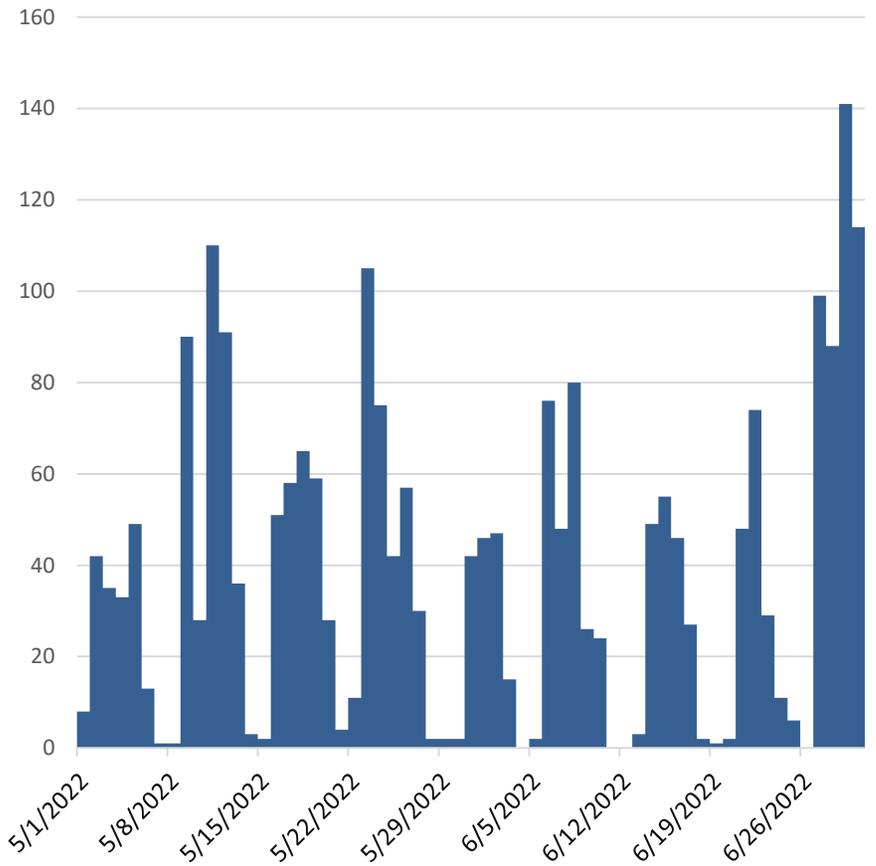

**Jet Noise Reports By Day May - June 2022**

**INSIDE Juan County**

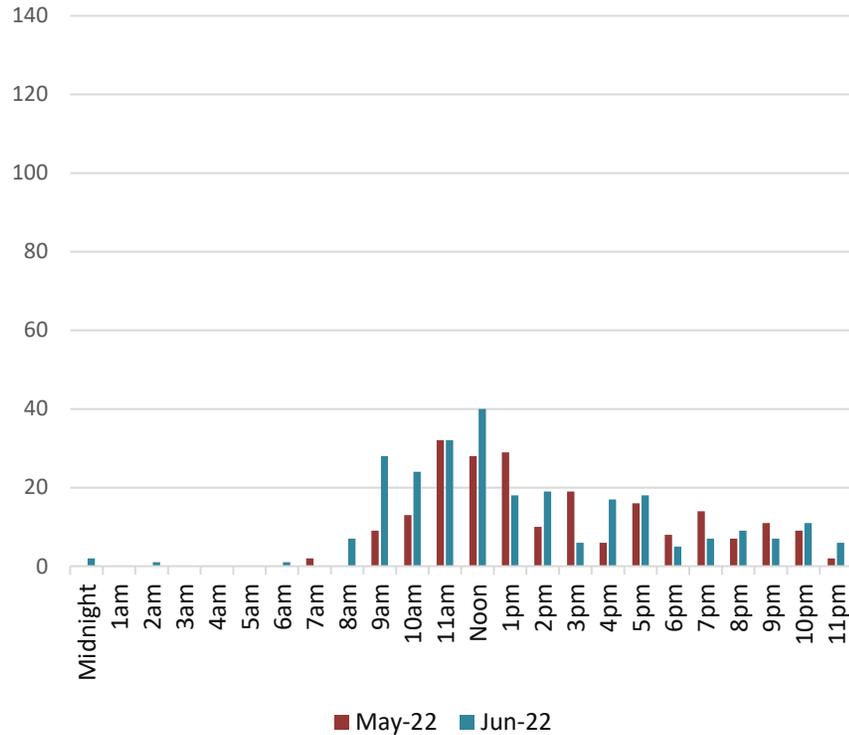

**Jet Noise Reports By Day May - June 2022**

**OUTSIDE San Juan County**

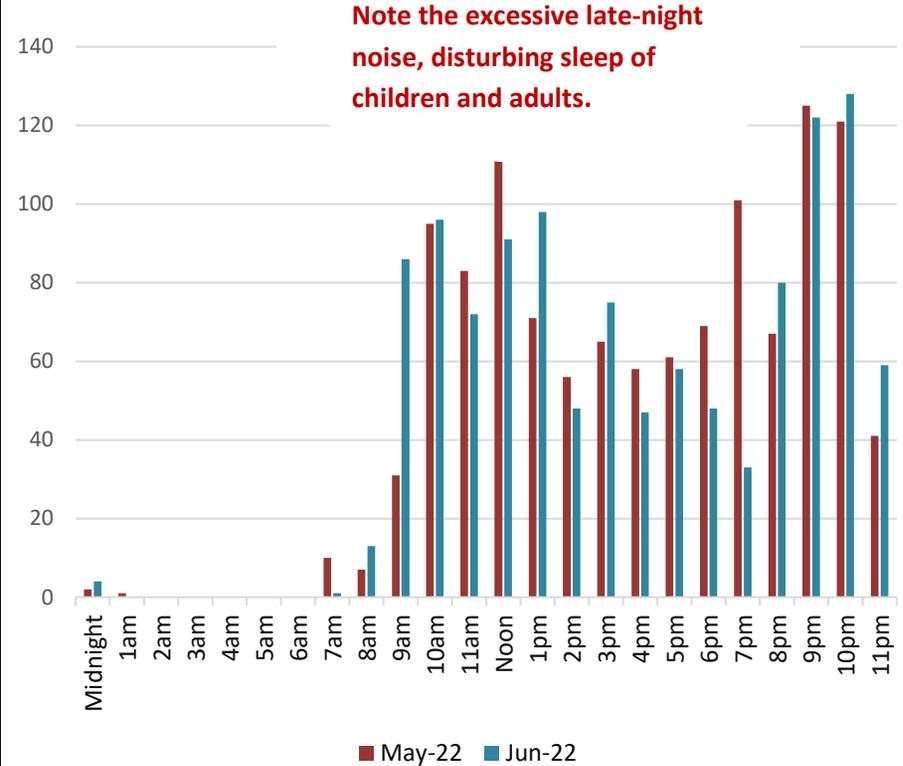

**Note the variation in noise experienced by month, day and location. The Navy persists in using “annual noise averaging,” significantly underestimating the impact of jet noise. There is no "average" noise felt by residents in this region. The noise is variable and unpredictable.**

**Jet Noise Reports by the Hour  
May - June  
INSIDE San Juan County**

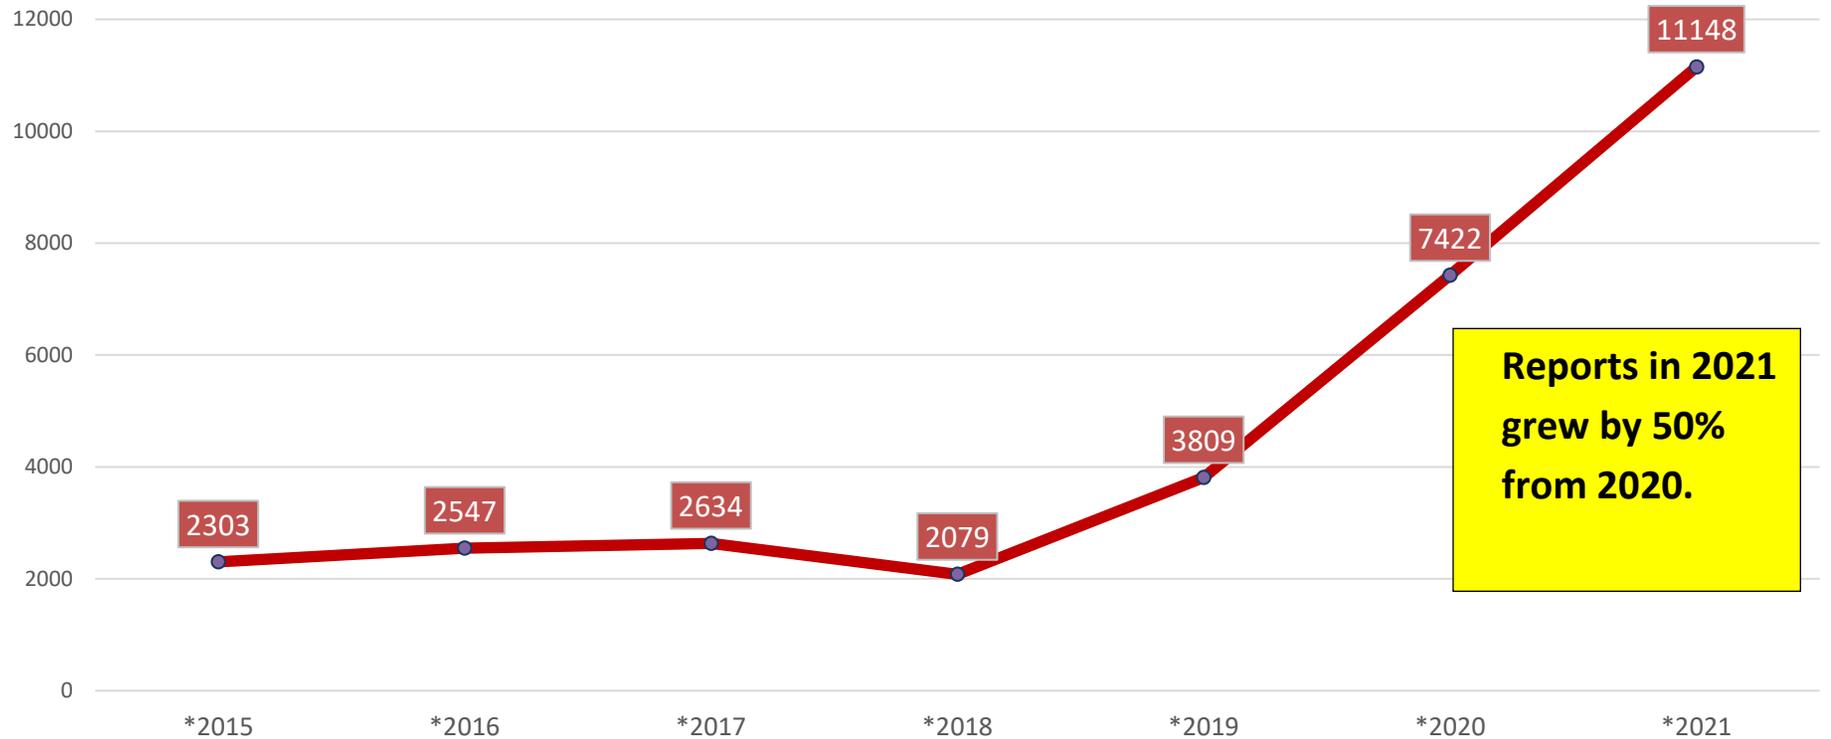

**Jet Noise Reports by the Hour  
May - June  
OUTSIDE San Juan County**

**For example, submissions that report noise 11:00 am through 11:59am are clustered in the 11 o'clock hour.**

**Note the variation in noise experienced during the day and night and in different locations. The Navy persists in using "annual noise averaging," significantly underestimating the impact of jet noise. There is no "average" noise felt by residents in this region. The noise is variable and unpredictable.**

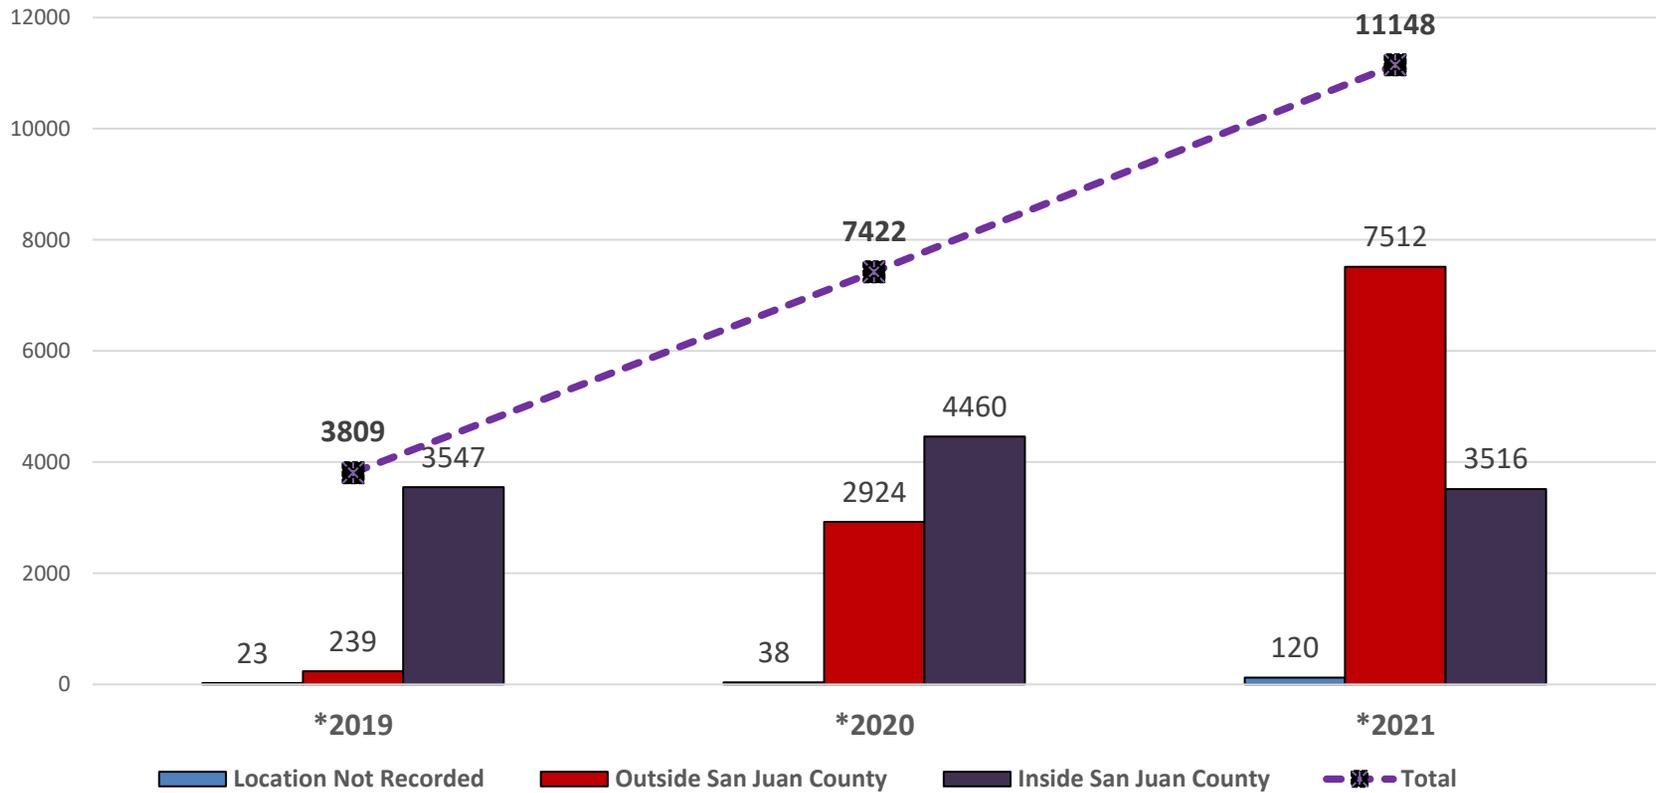

## Jet Noise Reports - All Locations 2015 - 2021

This chart provides some background to the history of noise reporting.

Jet noise reporting began in 2014 when San Juan County implemented a website for reporting jet noise. Data collection began in 2015. In the Fall, 2019, access was expanded to people outside of San Juan County enabling them to enter jet noise reports with the result that the number of noise reports is increasing, as has the number of aircraft at NASWI. This chart provides the simple totals of all noise reports in the database since 2015 through 2021.

## Comparing Jet Noise Reports by Location 2019, 2020, 2021

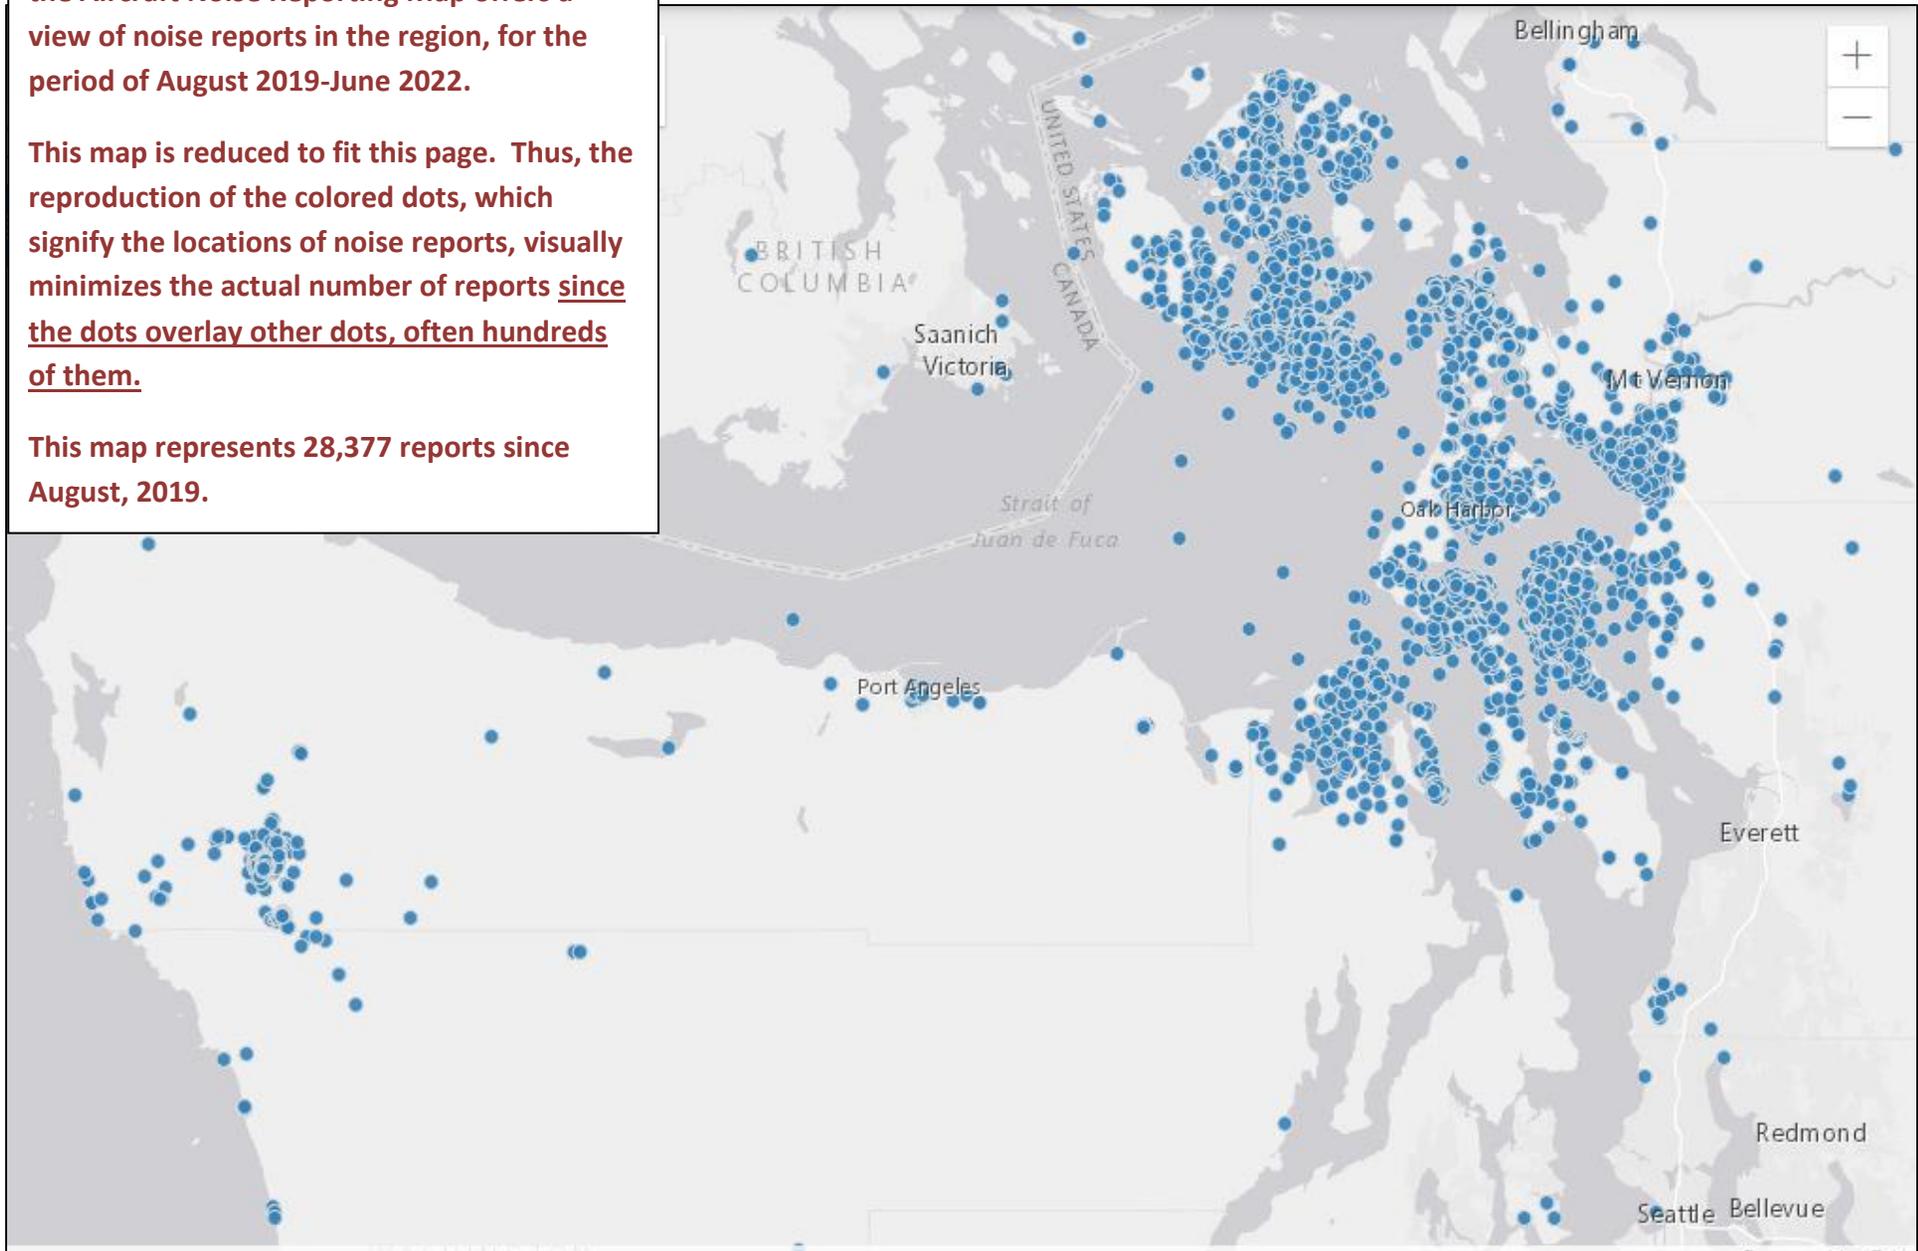

**In 2019 the noise report website expanded beyond San Juan County. With difference in flight paths and population it's not surprising that communities such as Whidbey Island are making more noise reports than San Juan County. The map on page 10 indicates the impact of the Growlers is felt throughout San Juan, Island, Skagit, Jefferson and Clallam Counties.**

Referred to as the “dot map”, this picture of the Aircraft Noise Reporting Map offers a view of noise reports in the region, for the period of August 2019-June 2022.

This map is reduced to fit this page. Thus, the reproduction of the colored dots, which signify the locations of noise reports, visually minimizes the actual number of reports since the dots overlay other dots, often hundreds of them.

This map represents 28,377 reports since August, 2019.

## Comments Submitted with May and June 2022 Reports

### NOTES:

Some reports indicate decibel level. Lawnmowers, for example, generally produce 90 dB. How would you like to have that running inside your home? Noise over 70 dB for a prolonged period of time is harmful to your ears and can cause permanent hearing damage. Noise over 120 dB can cause immediate harm to your ears.

Some of the people who submit a noise report also list their home address or phone number or e-mail. In this report, those personal identifiers are deleted/modified, as are expletives. Some reports do not include comments.

May 5 Sitting at the Anacortes Dock, waiting for the 4:30 ferry, and I swear the jets seemed 10 feet above us. Huge Noise. Wonder if tourists think this is a good place to visit. War Zone.

22:47. Jets having been flying over Quarry Pond campground since 22:10 and ruining any chance at sleep. This is surreal how the military is able to get away with flying so loud/low and disrupting people after 22:00.

Very loud and long jet roar. Heard the jet coming toward us, now it sounds like it is turning with an even louder roar. Growlers are TOO LOUD. When a jet drowns out your own household noise and conversation, something is seriously wrong. Lopez.

It is 11pm and they are still flying. It's warm in the house and we can't even open the window to cool off. Jet noise is keeping us from sleeping.

This was my first day moving into the area. The navy made what should have been a time for celebration and excitement an immediate nightmare. I am extremely concerned and disturbed that this level of noise is considered appropriate by any standards.

SE Lopez, 18 May 22, Wed. 2:57pm: Overflight 78.5 decibels

At sudden "explosive" window rattling roar began over head and now has evolved into the rapid cyclical rumblings of multiple Growlers' landing practice over eastern Whidbey. Miserable racket!!

I guess this is what happens when you are down on flight hours because of winter weather? Got to make them up some how 😞

Is it necessary for jets to fly over our house when there is a wide span of water between our house on Chuckanut Crest Drive and Lumi Island. There is plenty of inhabited space over the multi-mile span of water for a jet to fly. Thank you.

It's after 10PM for cryin' out loud!

Severe loud flights. Grand-kids are covering their ears inside the house. The 50 lb dog is hiding under chairs. I have ear plugs in and my heart feels like it is going to burst out of my chest. This is torture.

9:54am, 5/20. Stepped outside for some fresh air between Zoom calls. I had heard the noise while inside, but outside the noise is incredible. It sounds like there is a war going on. The jet roaring makes being outside unpleasant, to say the least.

On a Zoom call for work this morning and discussion interrupted because the jet screaming over my home was heard by the folks on the call. "What the h---- is that?" they asked. How to answer? Tell them the Navy treats us as a war zone?

Took kids on a nature hike. Non stop jet flights over nature preserve. Some times there were single flights some times, tandem, mostly Growlers but other Navy aircraft as well. Ruined the walk.

I wanted to note we are going to have tons of flying going on this summer .. 129 the training squadron has at least 500 hours to make up ... Due to weather and not staying on top of falling behind , we will experience the hours required plus the 500

It's unnerving to be drifting off to sleep only to have a low rumble start up in the distance and increase in volume until I'm wide awake again. We moved to Port Townsend last month for peace and quiet, and this seems to happen most every night.

Multiple Growlers flying in an uninterrupted loop practicing landings. Began hours ago and if recent experience is any indication, this will go until nearly midnight. Very disruptive!

Come on that growler flyby was way too loud for residential area

Deception Pass horrific growler noise.

DIRECTLY OVER OUR HOUSE. Yes, we are right by the landing zone - so WHY DON'T THEY USE THAT ZONE? They should be approaching from the Dugualla Flats, not DIRECTLY over our house with the loudest plane possible late at night. Be better neighbors.

SE Lopez, 28 June, 2022, Tuesday: 5:45pm ROARING OVERFLIGHT. Roaring went on and on. Guests from Seattle could not believe that this is happening in a place known for peace and quiet. . . and our government and the military . . . ignore us.

We don't mind fly overs at reasonable times of the day, but being woken up at 11:26pm by what seemed like lower-than-normal fly over is ridiculous. I immediately glanced at the clock which is why the time is precise.

USN Command cannot justify keeping the elderly, children, the early shift workers, awake at night when there are hundreds of locations to conduct

this training where U.S. citizens are not assaulted by this noise. Obviously, USN Command does not care,

Well I almost got to finish my coffee this morning before the growlers flew by deafening everyone below

What about the kids !!!!

Who can sleep with this assault of noise happening?

Why aren't the noisy growlers practicing in remote location like el centro instead of Here in a residential area. Too damn loud
